

Better Technology, Better Outcomes.

ABOUT ALAYACARE

AlayaCare is an end-to-end home health care software solution, focused on providing better patient outcomes through the use of next-generation technology such as virtual care, remote patient monitoring and machine learning.

WHAT WE DO

We provide a mix of real-time telehealth and face-to-face visit solutions, which combined, can streamline field staff operations, increase efficiency, improve communications and ultimately improve patient outcomes.

WHERE ALAYACARE MEETS HOME CARE

- ▶ **Real-Time Visit Verification** - Instantaneous alerts to supervisors of late or missed visits.
- ▶ **GPS Tracking** - Ensure field staff safety and schedule compliance.
- ▶ **Customizable Messages and Alerts** - Integrated email, mobile messaging, and telephony to streamline communication.
- ▶ **Schedule and Route Optimization** - Reduce travel premiums and compress schedules.
- ▶ **Employee-Client Matching** - Maximize compatibility by considering availability, utilization and skill-matching all in one place.
- ▶ **Decision Support Tools** - Support and inform clinical interventions with technology such as Machine Learning.
- ▶ **Intuitive Role-Based Interfaces** - Bringing clarity and focus to functional users.
- ▶ **Cloud-Based Solution** - Permit staff to access software from any internet enabled device.

A COMPLETE END-TO-END SOLUTION

A single system providing a fully integrated solution for improving client outcomes.

Remote Patient Monitoring

Maintain constant contact with patients through video conferencing, wearables and easy to use self-diagnostics integrated into AlayaCare's intuitive tablet app.

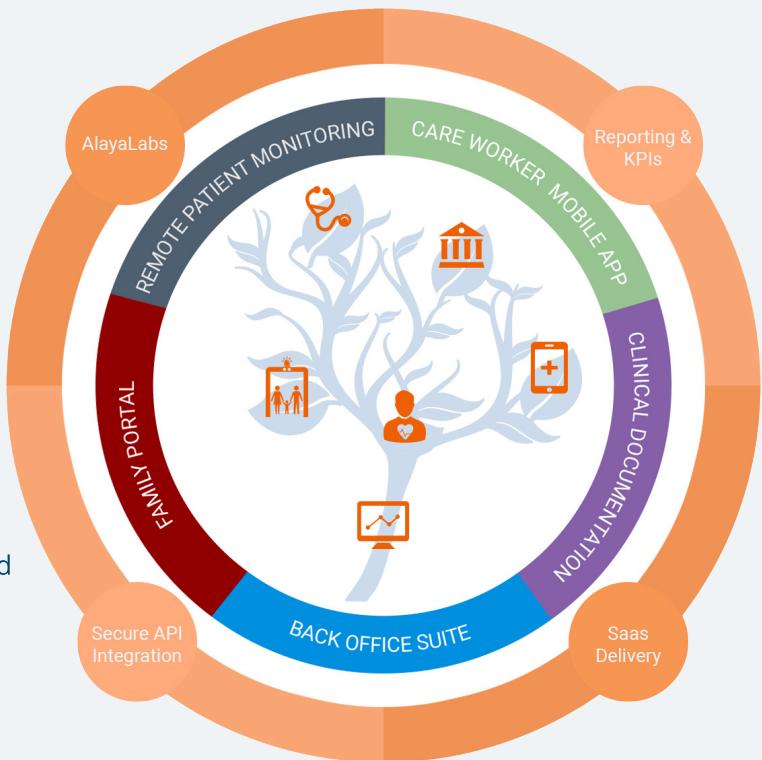

Care Worker Mobile App

Providing all field staff with real-time access to schedules, route details, billing, safety, time tracking, patient data, and form reporting. AlayaCare's intuitive, responsively designed, and feature-rich app is available on both smartphones and tablets.

Clinical Documentation

AlayaCare's configurable clinical forms and integrated multi-tiered, HIPAA compliant, cloud-based data storage environment allow for quick, efficient and secure data-handling.

Back Office Suite

Scheduling, reporting, and billing in a single, integrated view. AlayaCare's paperless back office suite is equipped with configurable KPIs, GPS-based electronic visit verification (EVV), and real-time updates.

Family Portal

AlayaCare's family portal feature is equipped with video conferencing, and provides key stakeholders with the tools they need to directly engage in the care of their loved ones.

AlayaLabs

Taking home healthcare software to the next level through Machine Learning, Remote Patient Monitoring, Big Data, and Schedule & Route Optimization.
