FEATURES

Real-Time Form Submissions

Reduce delays as clinical staff are able to upload and chart in real time.

Multi-Level Security

Document on a secure, HIPAA and PHIPA compliant cloud-based system.

Custom Configuration & Form Building

Build or convert any report to a digital format.

Compatible with Multiple Devices

Chart and document at the point of care from any device.

Configure documentation for high levels of client acuity such as wound care, infusions, medical reconciliation.

Minimize data entry courtesy of menu driven and predictive text data entry. Track progress with visibility into the previous form submission and review the report history of the client.
