

Using AlayaCare to meet Integrated Care needs

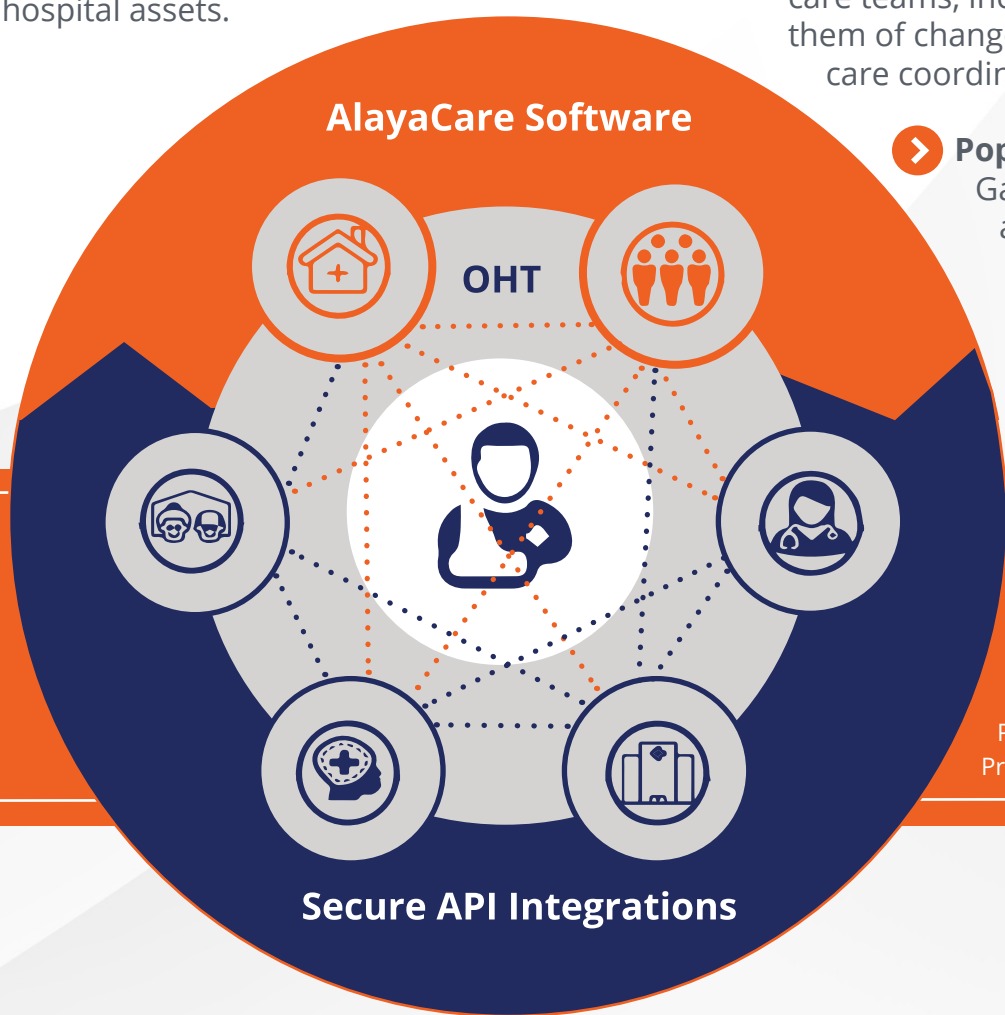

AlayaCare has a modern platform, already used by >80 providers within Ontario, that enables and delivers what OHT members need for digital connectivity and the best care for patients.

- > **Leading Edge Cloud Technology** - As a Software as a Service (SaaS) provider, you don't need to worry about an expensive IT infrastructure, cumbersome updates, version control or patient data security.
- > **Built-in APIs** - AlayaCare has built in APIs for easy data transfer and connection into the community (Caredove), provincial (CHRIS) and hospital assets.

- > **Predictive Analytics & AI** - We leverage Canadian strength in AI to transform: schedule & route optimization, readmission prediction and preventative intervention of chronic patients through sub-clinical risk stratification.
- > **SSO & Alerts** - Send notifications within care teams, including physicians, to notify them of changes in patient status or care coordination.

- > **Population Health** - Gather, manipulate and analyze pre- and post-acute device data across your entire geographic region.

CORE ALAYACARE FEATURES

- EHR
- Scheduling & coordination
