

*Energy efficiency. Made simple.*

M2030 bee is an online service that makes it easy for you to investigate, prioritise and execute energy efficiency actions within your manufacturing & distribution operations.

*Spend less time and make more progress. Be more Bee.*

M2030 bee can support your existing energy plan, or very simply help you create a new one.

With a constantly growing and updating database of good practice, simple unbiased support pages and links through to practitioners from different industries and regions who can help, M2030 bee overcomes those barriers that so often slow you up:

Time taken to stay on top of good practice & technologies when you've got a plant to run

Engaging the right colleagues across the business

Making a solid business case for budget

Dealing with numerous sales people all offering the best solutions to help you...

## M2030 bee by numbers

Average **6.7% energy saving** identified on first visit

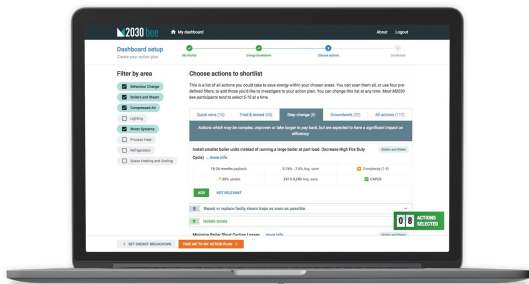

Average **saving of \$210,000**, per site, per annum

Growing dataset of **200+ actions**

## Expert reviewers include...

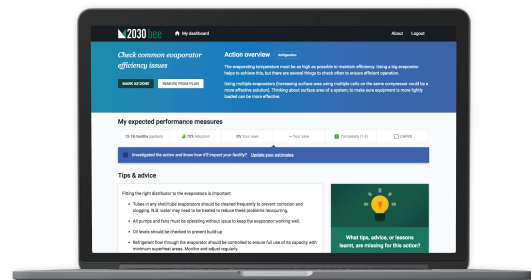

## IDENTIFY

Use your time wisely. M2030 bee's growing database of good practice allows simple comparison, letting you quickly customise a shortlist of actions. Prioritise your plan based on factors like ROI, availability of capital, and proven or emerging technologies.

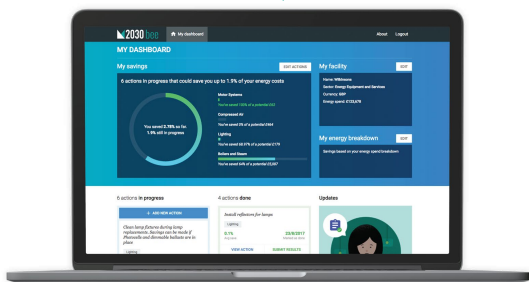

## INVESTIGATE

Use the action support pages in bee to get real tips, advice and lessons learnt from fellow manufacturing practitioners. Build your business case using case studies, industry data, and also the side benefits to an action, the opportunity costs, and the risks.

## IMPLEMENT

Effortlessly track progress using your dashboard. Get suggestions for new actions; track outcomes, and use as a powerful internal engagement tool to build support and recognition of your efforts.

*“A significant challenge all businesses face is knowing where to place time and resource. However, bee goes a long way to minimising this issue, as the Return on Investment and complexity data gives us an informed, indicative picture of what we need to concentrate on. This enables us to feel confident in placing more resource in projects which look more successful – saving us time, resource and money.”*

- Wayne Hodges, Engineering Manager, Freshtime
