## SUSTAINABLE MONTPELIER 2030 - DESIGN COMPETITION – Team Description

At Scott + partners we are very excited to be a part of this visionary project. We are a versatile Architectural firm that focuses primarily on commercial, healthcare, and multifamily housing design and planning. We have won awards in energy efficient design and have designed LEED and NGBS accredited buildings.

We have kept our project team small for this phase of the project. If we make it to the next round we will engage additional team members to help us design and develop a more detailed vision.

## Team Leader:

Joel Page, AIA – Principal at Scott + Partners, Inc. He has worked for Scott and Partners for twenty years. Joel is a former resident of Montpelier (ten years) and now lives in East Montpelier. Joel is the office's sustainable design leader. He has designed several energy efficient award winning projects.

## <u>Team</u>:

Julio Noriega, AIA, LEED AP, BD+C - Scott + Partners, Inc. Julio is a registered architect and has been a member of the Scott + Partners team for a little over a year. His experience in urban design and extensive graphic skills are important elements for this projects development.

Sophie Oros – Scott + Partners, Inc. Sophie interned with us this summer from France. She helped pull together and develop much of the back ground information for this project.

Mike McCarthy – Sun Common. Mike has provided guidance on the solar installations as well as preliminary solar calculations.

Rick Bove – HDI Real Estate, Inc. Rick is a visionary developer. He sees this project as an important first step to sustainable urban development. He encouraged us to take part and we are happy we have.

## Relevant Projects:

Please see attached project pages. The included projects are a snap shot of projects we have completed. Please feel free to explore our web site for more information.
