The Ultimate Outdoor Living Space to Unite Family and Friends

The ULTIMATE Outdoor Living Space to Unite Family and Friends

Visscher Specialty Products has been manufacturing the ultimate outdoor living space since 1997. Their wide array of great looking, long lasting outdoor living spaces unite families and friends in backyards everywhere. The Canadian-made structures are manufactured and packaged in Chilliwack, BC, using premium Canadian lumber.

Canadian wood is great-looking, long-lasting and durable. Wood is also a renewable and non-toxic material which is a sound choice for your outdoor living space. Your Visscher enclosure is designed to last for many years of enjoyment. Today, Visscher Specialty products produces pre-cut kits for the outdoor living and spa industries. Their on-site warehousing and remanufacturing facilities give them

access to the best lumber available, and facilitates quality control at each stage of production. Visscher is a family owned business.

There are many features and upgrades that you can choose with your pergola or gazebo. Automatic insect screens will keep you entertaining even during the buggiest of days. Upgrade to a magnetic insect screen. Screens stay tight to the opening with snap-tight mag-nets, allowing for quick removal for cleaning. You could add on a Bay Kit and a Bay Bench for additional space or create a resting place to sit and gaze out your outdoor living area. Add an extra level of control over your elements with an adjustable louver privacy panel blinds. Or add a Bar Kit, a perfect resting spot for your favorite refreshment.

Pergolas and Gazebos are available in 3 styles...

Open Air Provides shade protection and an architectural design element to your outdoor living space.

Semi Enclosed Provides shade protection, an architectural design element to your outdoor living space, and some provide insect protection.

Fully Enclosed Provides shade protection, an architectural design element to your outdoor living space, insect protection, and anything the outdoor environment will throw at you.

Open Air Valencia Pergola

The modern design of the Valencia Pergola sets your outdoor space apart from the rest. Choose your level of comfort with the Retractable Sun Shade that opens and closes in a matter of seconds. This is the year you commit to great times with your friends and family in your backyard with this

beautiful pergola. The Valencia Pergola provides shade protection and an architectural design element to your backyard. Available as a 10'x10' or a 10'x14' structure.

10' x 10'

Features

- ▶ SPF Structure is a category grade of wood from NW Canada. Spruce, Pine, Fir woods kiln dried to remove the moisture from the wood. This process ensures that the wood post doesn't warp.
- ▶ Striation Finish provides a decorative combined finish on the wood along with creating peaks and valley's that allow premium acrylic latex paint to soak into the wood. 5+ years down the road when you want a fresh look, no sanding or stripping is needed. A simple brush or roller is needed for a quick refresh.
- ▶ Kiln dried SPF structure with striation finish gives you the strength needed for longevity and less maintenance that we all want!
- ▶ Engineered decorative corner posts have the strength of an 8x8 posts without the block look of an 8x8 post. Aesthetically pleasing design!
- ▶ Shade canopy has a Teflon coating that makes the canopy 99% waterproof. If water sits on it for a long time it will eventually leak through. Almost all outdoor surfaces have a slight slope which means the water will run off to one side.
- ▶ Aluminum track with nylon bearings provide a smooth open and close. Opens smooth like butter!

Structure

Cream
Sun Shade

When Valencia Pergola is not in use, make sure the shade canopy is in the open position. If high winds occur and is left in the close position, you run the chance of the shade canopy acting like a sail and move the pergola.

Verona 11' x 14'

Visscher

Open Air Verona & Milano

Love your backyard under the shade of The Milano. Full length insect screens provide protection from the pesky bugs, and drapes allow you to vary your level of privacy. Solid SPF wood construction is a rich addition to your property. Stretch your relaxation time under the Verona. This model comes in our new modern color with an attractive and durable metal

Milano 11' x 11'

roof. The Verona adds an extra 33 sq ft of coverage over the 11'x11' model and adds a large skylight. The Verona & Milano provide shade protection, privacy, and insect protection. Available as a 11'x11' or a 11'x14' structure.

Features

- ▶ SPF Structure is a category grade of wood from NW Canada. Spruce, Pine, Fir woods kiln dried to remove the moisture from the wood. This process ensures that the wood post doesn't warp.
- ▶ Striation Finish provides a decorative combined finish on the wood along with creating peaks and valley's that allow premium acrylic latex paint to soak into the wood. 5+ years down the road when you want a fresh look, no sanding or stripping is needed. A simple brush or roller is needed for a quick refresh.
- ▶ Kiln dried SPF structure with striation finish gives you the strength needed for longevity and less maintenance that we all want!
- ▶ Engineered decorative corner posts have the strength of 8x8 posts without the block look of an 8x8 post. Aesthetically pleasing design!
- ▶ Galvalum roof hybrid between galvanized steel and aluminum. 10 year warranty against corrosion. 40 year life expectancy.
- ▶ Attention to detail, the little things that become huge points of interest. All roof screws have rubber washers so that water does not leak through the roof. Foam insulation is inserted where the roof meets the walls to prevent insects from entering through the gap.
- ▶ 2 Screens - All 4 sides open and close independently. First screen provides protection from insects. Second screen provides privacy when needed (keeping those nosy neighbors guessing what's going on inside) and a sun shade when the sun is setting.

Visscher

Fully Enclosed Barcelona

The Barcelona is Visscher's most modern-styled backyard structure. Imagine you and your family enjoying the outdoors with an appealing, clean, contemporary design. Extra large bi-fold windows let you bring the outside in, while the feature walls and transom windows give you the privacy you need.

The Barcelona provides shade protection, an architectural design element to your outdoor living space, insect protection, and anything the outdoor environment will throw at you. Available as a 11'x14' or a 11'x11' structure.

Bay Kit

Features

- ▶ SPF Structure is a category grade of wood from NW Canada. Spruce, Pine, Fir woods kiln dried to remove the moisture from the wood. This process ensures that the wood post doesn't warp.
- ▶ Striation Finish provides a decorative combined finish on the wood along with creating peaks and valley's that allow premium acrylic latex paint to soak into the wood. 5+ years down the road when you want a fresh look, no sanding or stripping is needed. A simple brush or roller is needed for a quick refresh.
- ▶ Kiln dried SPF structure with striation finish gives you the strength needed for longevity and less maintenance that we all want!
- ▶ Engineered decorative corner posts have the strength of 8x8 posts without the block look of an 8x8 post. Aesthetically pleasing design!
- ▶ Magnetic on/off screens provide insect protection when windows are opened.
- ▶ Galvalum roof hybrid between galvanized steel and aluminum. 10 year warranty against corrosion. 40 year life expectancy.
- ▶ Attention to detail, the little things that become huge points of interest. All roof screws have rubber washers so that water does not leak through the roof. Foam insulation is inserted where the roof meets the walls. This prevents insects from entering through the gap.
- ▶ Privacy panels look like cedar planks but they're not. They are made from concrete board (cement, commonly Hardie Board). We use this because it is impervious to outdoor weather. It is weatherproof and very low maintenance.
- ▶ All windows are tempered glass in an aluminum frame and open 100% left or right and lock when closed. Competitor gazebo windows are wood framed with plexiglass. Those windows only open 1/2 way and are not kilned.

- ▶ Gazebo built on 40" interchangeable panels. Allowing for customization location of any panel with a window or privacy panel. French style door takes up to (2) 40" panels.
- ▶ Expandable bay kits allow your gazebo to become larger.

... Additional Benefits and Features

SPF Wood Structure

There is nothing quite like the warmth, strength and feel of solid wood. Visscher uses only a specific, high-grade SPF lumber harvested here in Canada. We are proud to say we profile every board at our own mill to ensure a consistent quality product. Combined with our rigorous, double-coat paint process, this material is treated to last.

Bay Kit System

The Bay Kit is the ultimate add-on to a Visscher fully enclosed structure. The addition of one, two, three or even four bays means your structure is fully customizable. Not only does it instantly add square footage to the interior, but the bay also adds a stylish look that will set your enclosure apart from the neighborhood.

Bi-Fold Windows

These are the largest windows offered on a Visscher structure. Aluminum and tempered safety glass combine to make a beautiful and functional window. Roller wheels let you open and close the window with ease, and a pin lock makes security easy. You choose if the bi-fold is to open to the left or the right with our adjustable opening system. Smoked glass adds a touch of privacy.

UV Resistant Drapes

Open these drapes wide and bring the sunshine in. Or, draw the drapes closed and enjoy your own private oasis. Durable aluminum roller tracks let these drapes open quickly and smoothly - in case your mood changes in either direction.

Magnetic Screens

Our magnetic insect screens let you enjoy the breeze and keep the bugs out. The screens stay tight to the opening with snap-tight magnets, also allowing for quick removal for cleaning.

Made in Canada

Made in Canada. We're proud to say it. Wood materials sourced from Canada guarantees a finished structure as beautiful and strong as the land that grew it. Our mill and manufacturing plant are located in Chilliwack British Columbia, not far from the forests where our wood materials are harvested. Each wood component is graded, cut and painted in our own facilities, which gives us the ability to provide a consistent, high-quality end product.
