Objective

I am a recent graduate of devCodeCamp where I built a strong foundation for coding with an emphasis on the tenets of Object-Oriented Programming. Additionally, with my experience in both the healthcare and hospitality industries, I bring a unique perspective, strong communication skills, and a drive for collaboration. I am seeking a position as a software developer where I can apply my talents and continue to grow and learn as a developer.

Technologies

C#, HTML, CSS, JavaScript, Bootstrap, SQL, ASP.NET Core, AJAX, jQuery, APIs, JSON, Git, Microsoft SQL Server

Projects

WhatsSupp

Technologies: ASP.NET Core, HTML, CSS, Google Geolocation API, RapidAPI US Menus API

Overview: Allows two users to click through a shared collection of restaurant suggestions in order to find common ground between the users' current moods. [Project Link](#)

Features:

- Allows users to create a profile with cuisine preferences which will serve as the basis for the query
- Users can search for and find others to add to their contacts list
- Users can view menu items, when available, before responding to a specific suggestion

Pet Manager

Technologies: ASP.NET Core, HTML, CSS, JavaScript Google Geolocation API, Twilio SMS API

Overview: It creates an interface where people can manage chores for their various pets with functionality for other users who may share responsibility for the given pets. [Project Link](#)

Features:

- A daily, checkable to-do list populates on the user's homepage.
- Allows contacts of the user to check off tasks for a pet if they are sharing responsibility
- Sends a daily reminder SMS to the pet owner of the tasks that have yet to be done for the day

Movie Library

Technologies: ASP.NET Web API, JavaScript, jQuery, AJAX, HTML, CSS, Postman

Overview: Built a REST web API for a movie database in ASP.NET with a jQuery front-end. [Project Link](#)

Features:

- Allows users to search for movies, add movies to the database, view results, and edit movie details
