## **XYBIX SYSTEMS, INC. SIGNS RESELLER AGREEMENT WITH PREFERRED ERGONOMICS**

*Companies' new reseller agreement provides broad selection of ergonomic workstations and consoles to the VA and the DoD under veteran-owned set-aside program*

LITTLETON, CO—(April 22, 2020) Xybix Systems, Inc., a leading provider of ergonomic workstations and consoles for 24/7 mission-critical announced today it has signed a reseller agreement with Preferred Ergonomics. As a service-disabled veteran-owned small business (SDVOSB), Preferred Ergonomics will provide Xybix workstations and consoles to the U.S. Department of Veterans Affairs (VA) and the Department of Defense (DoD) under the SDVOSB set-aside program.

In business for 29 years, Xybix is a leading designer and manufacturer of ergonomic, height-adjustable workstations and consoles that ergonomically comply with the American National Standards Institute (ANSI) and the Human Factors and Ergonomics Society (HFES) National Ergonomic Standard. Xybix desks are certified by the GREENGUARD Institute, which tests and guarantees environmental sustainability for products that emit little or no volatile organic compounds (VOCs) into the air. Xybix Systems currently serves mission-critical operations in government, corporate, and academic institutions.

“We’re pleased to be associated with the mission and quality that Preferred Ergonomics is known for—and proud to outfit our men and women who keep our country healthy and safe with comfortable, ergonomic workstations and consoles that enable them to do the 24/7 work of serving and protecting our country,” said Xybix president Barry Carson. “We look forward to being a key component of Preferred Ergonomics’ mission-critical ergonomics program.”

SDVOSB-certified Preferred Ergonomics was founded in 2016 by Navy veteran John Young to serve both commercial and government markets with ergonomic design and training. After sustaining injury in service to the U.S. Navy, Young utilized the Post-9/11 G.I. Bill to pursue a degree in Exercise Science and Health Promotion. After founding IT company Preferred Supplier, Young realized firsthand the benefits of an ergonomically designed office and knew he could further help commercial and government organizations and their employees. Young pursued further academic studies in ergonomic health, and in 2016 established Preferred Ergonomics.

“Xybix’s product exemplifies the ergonomic design and overall quality we at Preferred Ergonomics provide to our customers,” said John Young, President of Preferred Ergonomics. “We are proud and excited to add Xybix to our product line to serve the VA and DoD

markets.”

## **ABOUT XYBIX**

XYBIX Systems, Inc. is a leading designer and manufacturer of ergonomic, height-adjustable console furniture for 24/7 mission-critical operations, including 911 Centers, Command and Control, and Healthcare. Customers know Xybix best for its premium, ergonomic line of workstations and consoles designed for the health and performance of mission-critical operators in public safety, healthcare and public/private infrastructure throughout North America. U.S.-manufactured in Littleton, CO, Xybix product design springs from the company’s unique expertise in ergonomics, space planning, and environmental control.
