# Driving Change with Driving Data

Arity combines the unparalleled power of telematics and industry expertise to help insurers price more accurately and motivate safer driving. Integrating Arity's open, configurable platform into Duck Creek's proven workflow accelerates end-carrier's speed and ease to market. Whether you seek to launch a telematics program from scratch or enhance existing capabilities, Arity and Duck Creek together can help you reach your goals with a superior joint solution.

## Pricing insurance just got a whole lot more accurate.

### Capture driving data

You can collect data using our off-the-shelf mobile app, embedding our SDK into your app, or using a tag or OBDII device. Have your own data source? We can use that, too.

### Streamline rating & reporting services

Subscribe to our driving score models, which are pre-approved with regulators to ease the filing process. Then, once you're deployed, utilize our smart dashboard to effectively manage your funnel and customers.

### Get it all in one place

We have onboarding and sales support, our own suite of telematics products and analytical acumen, all in one package. Simplified deployment gets you up and running in a well-designed program faster.

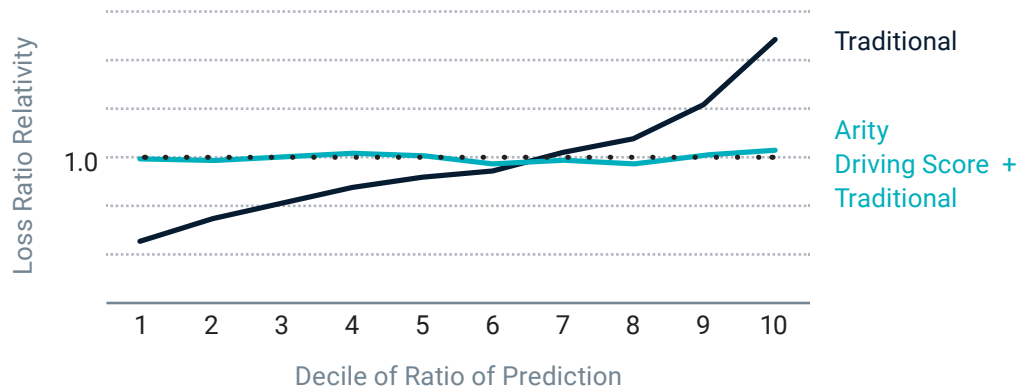

### Better predict driver risk & future losses

Our models combine both traditional and sophisticated telematics data, including phone use, to deliver the best prediction of driving risk.

# The Arity Difference

The Arity Driving Score closes the gap caused by pricing inefficiencies in traditional rating plans, bringing you closer to true personalized pricing.

## Your partner every mile of the way

Founded by Allstate, Arity is focused on making transportation smarter, safer, and more useful for everyone. From planning, to rating and filing, to deploying your telematics program, we want to ensure your ongoing success.
