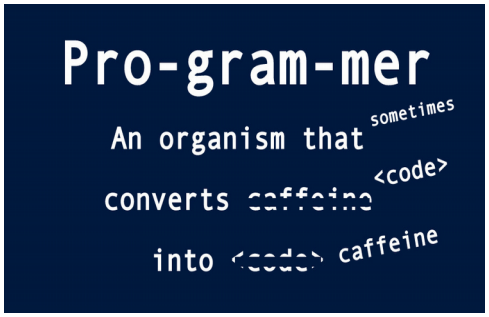
Dina Misener

- Manager of Application Development



Future Improvements

- Goals
- Where is Mirus BI heading?
- What's coming soon...

Goals

- Invest and grow our technical expertise and usage
  - Streamlining and refactoring our code base

- Expanding Mirus Feature Repository

Invest and Grow

- Single Page App (SPA)
  - Web application that fits on a single web page
    - April 2014 – introduced AngularJS
  - How does this benefit me?
    - The entire page does not reload – only new data is sent – no HTML
      - Improved user experience
      - More responsive because of no full page refreshes

Invest and Grow

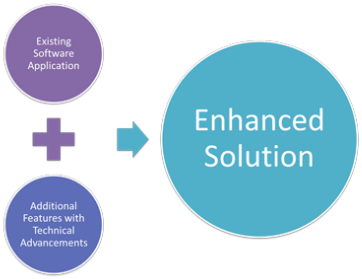
- Smart DashBoard™, Reports, Tools = SPA
  - Other areas that have been upgraded
    - Login page, custom client tools, share screens...
- We are building a strong foundation for Mirus BI through adoption of industry wide technologies that are continually improving their product.
- Cleaner, encapsulated code provides a path to deliver features and function more rapidly.
  - Building components for reuse

Expanding Mirus

- How do features and new functionality make it on the “To Do” list?
  - Thanks for attending.
  - Communicating your needs and desires to your Account Coordinator.
    - Sharing multiple reports, Dimension Grand Totals
  - MCON Survey

Where is Mirus BI heading?

- Report Writer Renovation Process
  - Improve the overall design, interaction, quality and usability of each feature and function available.
  - Why?
    - To create a easy-to-use, feature-rich application to help you get the most our of your data.
  - How?
    - Moving into our SPA Model
    - Eliminating the Edit Page Interface



Report Writer Renovation

- Two Categories
  - New Features
    - Sparklines, Row Span, Scroll, Remove Personalizations
    - What did we learn?
  - Existing Features
    - Filter Creation (aka Switch Headers), Totals
    - What did we learn?

Report Writer Renovation

- Next Potential Movement
  - PDF Advanced
  - Scheduling a Report (Alert)
- Next New Feature
  - If / Then (sneak peek)
- Where will it all go?
    - Report Menu Revamp

Recap

- More interactivity with your data
- More modern UI/UX
- More feature and functionality
- Time to see the new stuff….
