ITEM 265-B

DEFINITION OF OR SPECIFICATIONS FOR LIFT TRUCK SKIDS, PALLETS OR PLATFORMS

Sec. 1. Definition—Lift truck skids, pallets or platforms are portable platforms, generally having rectangular or square dimensions. Top decks (surfaces) provide a flat load-bearing area and may be of solid, slatted, intersticed ☐ or ribbed construction. Top decks are attached to and supported by multiple stringers (runners) or blocks (posts) sufficient to support the ☐ article(s) loaded thereon. ☐ The lift truck skid, pallet or platform must be designed so as to provide access for fork handling equipment and/or pallet jacks. Lift truck skids, pallets or platforms may or may not have bodies, enclosures, standards, stacking posts or bottom decks, but do not have wheels or casters. Construction may be of solid or composite wood, fiberboard, metal, plastic or any combination thereof. Design material and construction are dependent on load type, planned use, and whether expendable or reusable.

Sec. 2. Requirements—Lift truck skids, pallets or platforms must be of sufficient design, size and strength to ☐ ensure the article(s) loaded thereon cannot cause any failure of structural components, and must be able to support a double-tiered load of equal weight and distribution. ☐ Deck boards must be sufficiently close to one another to adequately protect article(s) from underside damage caused by fork handling equipment or pallet jacks, and to prevent article(s) from falling through the deck. The structural integrity of the lift truck skid, pallet or platform must be capable of withstanding the normal rigors of the less-than-truckload environment. Two or more lift truck skids, pallets or platforms must not be used in combination to create or in lieu of a single, appropriately sized platform. See also Item 680, Sec. 7(b).

RULES

ITEM 680-A

PACKING OR PACKAGING—GENERAL

General

Sec. 1. (a) The separate descriptions of articles provide the minimum, acceptable packaging requirements, see Note 1. Numbered packages or other packaging provisions (other than 'DOT Specification Number' packages, for which, see DOT's hazardous materials regulations) are authorized for use only when item descriptions contain reference thereto. The definitions of or specifications for packaging requirements are provided in: (1) Items 200 through 299, (2) numbered packages and (3) Note references. The minimum requirements notwithstanding, articles must be tendered for shipment in such a manner as to withstand the normal rigors of the less-than-truckload environment. Whether or not part of the specific requirements, protective packing forms or other packaging materials must be used where necessary to afford adequate protection against damage to the articles being shipped. Articles or articles and necessary interior packing forms must reasonably occupy the full cubic capacity of the outer shipping container, see Notes 2(a), 3 and 4. Articles unitized or secured on lift truck skids, pallets or platforms must reasonably occupy the full surface area of the lift truck skid, pallet or platform, see Note 2(b) and (c).

Note 1—The term 'packaging requirements' as used in this Classification or in tariffs governed thereby means the provisions which specify: (1) the kinds or specifications of the containers, packages or other manner in which the articles shall be packed or protected for shipment, and (2) how the articles shall be packed or protected by or within such containers, packages or other manner.

Note 2—

(a) Reasonable Occupancy of Shipping Container. Unless otherwise provided, commodities in shipping containers (not containers within containers) shall be deemed to be in compliance when filled to not less than 65 percent of the capacity of such containers. When filled to less than 65 percent of capacity, the gross weight of the container and its contents will be subject to the class applicable to either the container or its contents, whichever is higher.

(b) Reasonable Occupancy of Lift Truck Skid, Pallet or Platform Deck. Unless otherwise provided, and except as permitted in paragraph (c), commodities unitized or secured on lift truck skids, pallets or platforms shall be deemed to be in compliance when occupying not less than 65 percent of the full surface area (deck) of the lift truck skid, pallet or platform. The surface area occupied shall be determined by multiplying the greatest straight-line dimensions of length and width of the commodity(ies). Banding, strapping, wrapping or other materials used for securement to the lift truck skid, pallet or platform will not be considered in the determination of occupancy. When less than 65 percent of the surface area of the lift truck skid, pallet or platform is occupied, the gross weight of the lift truck skid, pallet or platform and the commodity(ies) unitized or secured thereon will be subject to the class applicable to either the lift truck skid, pallet or platform or the commodity(ies), whichever is higher.

Any part of the commodity(ies) shipped that may overhang the lift truck skid, pallet or platform will not be used in determining occupancy of the surface area, but will be used in the computation of density. (See Item 110, Sec. 8-8(d).)

(c) Maximum Allowable Dimensions of Lift Truck Skids, Pallets or Platforms for 'Potentially Unstable Commodities.' For the purpose of this rule, commodities having an overall height 1.5 times or more their shortest base dimension shall be considered potentially unstable. For such commodities, the lift truck skid, pallet or platform may be of sufficient size to provide adequate stability. The maximum allowable dimensions of the lift truck skid, pallet or platform are determined using the following formulas.

The **Maximum Allowable Length** is the larger result of the following calculations:

$$\text{Maximum Allowable Length (in)} = \text{Commodity's(ies') Height (in)} \times 0.67$$

OR

$$\text{Maximum Allowable Length (in)} = \text{Commodity's(ies') Length (in)} + 12 \text{ (in)}$$

The **Maximum Allowable Width** is the larger result of the following calculations:

$$\text{Maximum Allowable Width (in)} = \text{Commodity's(ies') Height (in)} \times 0.67$$

OR

$$\text{Maximum Allowable Width (in)} = \text{Commodity's(ies') Width (in)} + 12 \text{ (in)}$$

If the lift truck skid, pallet or platform exceeds the maximum allowable length or width, as calculated above, the gross weight of the handling unit will be subject to the class applicable to either the lift truck skid, pallet or platform or the commodity(ies) being shipped, whichever is higher.

Note 3—Unless otherwise provided, reels, spools or flanged cores used as shipping containers which are not filled to equal or exceed their weight with a product, will be charged for at the class applicable to the empty spool, reel or flanged core. Reels, spools or flanged cores filled with a product equal to or exceeding the weight of the reel, spool or flanged core will be charged for at the class applicable to the commodity wrapped or wound thereon.

Where the net weight of the product is less than the tare or empty weight of the container, the lower charges applicable to the product may be assessed by declaring, at time of shipment, an increased weight for the shipment equal to two times the tare weight of the reel, spool or flanged core. In such instances, the shipper must declare the following on the bill of lading: (1) the tare or empty weight of each reel, spool or flanged core; (2) the actual gross weight of each shipping container with product as tendered for shipment; and (3) the resultant declared gross weight.

Note 4—Unless otherwise provided and unless subject to classes based on density, liquid, powdered or granular commodities or materials packaged in rigid or semirigid primary containers in an authorized outer shipping container must occupy at least 65 percent of the primary container's cubic capacity. When filled to less than 65 percent of the primary container's cubic capacity, the gross weight of the commodity as packaged for shipment will be subject to the class applicable to either the primary container or its contents, whichever is higher. Does not apply when primary inner containers are in intermediate inner containers and then placed in an outer shipping container.

Sec. 1. (b) Unless otherwise provided for in the separate descriptions of articles, where classes are provided for 'loose' or 'in bulk,' such classes will also apply on the same articles when in packages; or if no packing or form of acceptance is mentioned, the classes will also apply on the same articles when loose or in packages. See also Secs. 5(a) and (b).

Carrier's Option to Accept or Refuse

Sec. 2. Except as provided in Item 423, whether or not the authorized minimum packing requirements are observed, outer (shipping) containers or packages, inner containers, interior protection devices, method of packing within containers or packages, or other form of shipment authorized must be made of materials of such strength or be of such nature as to afford a reasonable and proper protection of lading and to protect against damage to other freight or equipment, and carriers may for good reason refuse to accept freight the transportation of which, in their judgment, would not be reasonably safe and practicable and so notify the shipper.

(Continued on following page)

RULES**ITEM 680-A-Continued****Liquids, or Commodities that will Expand, Liquefy or Vaporize**

Sec. 3. Liquids, or commodities that will expand, liquefy or vaporize under any conditions during transportation must be secured in containers that will prevent leakage from such containers.

Recoopering

Sec. 4. Provided that the shipper is notified beforehand, the carrier shall have the right to perform necessary recoopering at owner's or shipper's expense except when necessitated by carrier's negligence.

Definitions of the Terms 'In Packages' and 'Loose'

Sec. 5. (a) When the term 'in packages' is provided in connection with the separate descriptions of articles, such articles will be accepted for transportation in any container or in any other form tendered to carrier which will permit handling into or out of vehicles as units, provided such containers or tendered forms will render the transportation of freight reasonably safe and practicable so that it will withstand the normal rigors of the less-than-truckload environment. The term 'in packages' includes articles securely fastened to lift truck skids, pallets or platforms, or unitized quantities, but does not include articles 'in bulk,' 'loose,' 'on skids' or articles racked or braced in vehicles.

Sec. 5. (b) The term 'loose' is defined as freight that is not packaged, not unitized, not on skids and not securely fastened to lift truck skids, pallets or platforms. When the term 'loose' is provided in connection with the separate descriptions of articles or where no packing or form of acceptance is specified, articles may be tendered loose for transportation only when the transportation of the articles is reasonably safe and practicable so that it will withstand the normal rigors of the less-than-truckload environment. Where necessary to afford adequate protection against damage, articles must be packaged or otherwise protected by packing forms or other packaging materials.

Inner Containers versus Outer Containers

Sec. 6. (a) The containers or packages provided in individual items are outside shipping containers, and the rates or classes shown in connection therewith apply whether the contents are in bulk, loose or in inner containers; except in those instances where items specifically provide classes when 'in inner containers' in specified containers, and except where items provide classes when 'in bulk' in specified containers.

Sec. 6. (b) Except as otherwise provided, when classes or rates are provided for articles in boxes, in glass in boxes, in containers in boxes, or in inner containers in boxes, such rates or classes will not apply on articles in glass carboys in boxes.

Sec. 6. (c) Except as otherwise provided, rates or classes shown for articles in glass inner containers also will apply on the same articles in earthenware or molded plastic inner containers.

Sec. 6. (d) Where in individual items, classes or ratings are provided for articles in metal inner containers, such classes or ratings apply only on articles in inner containers constructed of metal and having rigid, self-supporting sides.

Articles Secured to Skids or to Lift Truck Skids, Pallets or Platforms, or Bundled Together

Sec. 7. (a) Articles in packages or shipping forms, as authorized in individual item descriptions, will be accepted when secured on skids meeting the requirements of Item 270. When articles are authorized to move 'on skids' within individual item descriptions, skids must meet the requirements of Item 270.

Sec. 7. (b)

(1) Except as required in Paragraph (2), articles in packages or shipping forms, as authorized in individual item descriptions, will be accepted when unitized or secured on lift truck skids, pallets or platforms meeting the requirements of Item 265. Unless otherwise provided, when in the specifications of numbered packages or in individual item descriptions articles are required to move on lift truck skids, pallets or platforms, such skids, pallets or platforms must meet the requirements of Item 265. Except where required by the applicable provisions, it is recommended that articles unitized or secured on lift truck skids, pallets or platforms not overhang the skid, pallet or platform deck.

(2) Articles in bags complying with the construction requirements for such containers, as authorized in individual item descriptions, will be accepted when unitized on lift truck skids, pallets or platforms meeting the requirements of Item 265, provided the bottom tiers of bags are placed within a fiberboard tray, with or without a separate fiberboard sleeve, on the lift truck skid, pallet or platform deck. Depth of the tray or tray and sleeve, as the case may be, must extend at least 20 inches from the lift truck skid, pallet or platform deck. Bags, tray and, where present, sleeve must not overhang the deck, and the entire handling unit must be secured together with plastic film and with strapping in opposing directions, at least two straps in each direction. Fiberboard protectors or a barrier sheet of fiberboard, heavy-duty Kraft paper or similar material must be used to prevent direct contact between straps and bags. See Note 5.

Note 5—These requirements do not apply on articles in flexible intermediate bulk containers (FIBCs), including bulk bags.

Sec. 7. (c) Articles in fiberboard boxes complying with the construction requirements for such containers, as authorized in individual item descriptions, will be accepted when unitized into bundles with stretch or heat-shrinkable plastic film, or the strapping materials named in Item 680, Secs. 9 (a) or (b). Materials used to bundle containers must be of sufficient number and strength to maintain the integrity of the unit during transportation.

Packing—Mixed Shipments

Sec. 8. Unless otherwise provided in the separate description of articles, the package specifications, conditions and all other requirements governing articles in straight shipments apply on the same articles when in mixed shipments.

Strapping or Taping of Articles or Packages

Sec. 9. (a) Unless otherwise provided, where the use of metal straps, rope or wire is specifically authorized or required, or where an article must be 'strapped,' filament-reinforced pressure-sensitive or gummed tape complying with the following specifications may be used:

Pressure-sensitive tape not less than $\frac{3}{4}$ inch in width reinforced with continuous longitudinal woven or unwoven filaments imbedded in an adhesive, or gummed tape not less than $\frac{3}{4}$ inch in width reinforced with continuous longitudinal unwoven filaments imbedded in an adhesive. Tape must have longitudinal tensile strength of:

(1) Not less than 160 pounds per inch of width and not less than 12 percent stretch at break.

OR

(2) Not less than 240 pounds per inch of width and not less than three percent stretch at break. Such tape must be used as a complete band with a four-inch overlap of the tape on itself.

Sec. 9. (b) Unless otherwise provided, where the use of metal straps, rope or wire is specifically authorized or required, or where articles must be 'strapped,' strapping made of the following materials and meeting the following requirements may be used:

(1) Synthetic fiber strapping, consisting of cords or yarns held in parallel position by adhesive or by being bonded to paper. Strapping must have a longitudinal strength of not less than 200 pounds per $\frac{1}{4}$ inch of width with not less than 12 percent and not more than 20 percent stretch at break-point.

(Continued on following page)

RULES

ITEM 680-A-Continued

(2) Extruded oriented nylon, polyester or polypropylene strapping must have a tensile strength of not less than 200 pounds per $\frac{1}{4}$ inch of width, with not less than seven percent and not more than 20 percent stretch at break-point.

Definition of 'Wrapped'

Sec. 10. (a) When in the separate description of articles the word 'wrapped' is referred to as a form of exterior packaging, such articles must be enclosed or enfolded within packaging material which completely covers the article. Such wrappers must be securely fastened. This method of packaging must render the transportation of freight reasonably safe and practicable so that it will withstand the normal rigors of the less-than-truckload environment.

Sec. 10. (b) Except as provided elsewhere in this Classification, when plastic film wrap is used, the film strength should afford sufficient protection to the freight. The plastic film must be wrapped so as to adequately secure the freight together and to the lift truck skid, pallet or platform, when present.

In order to test the sufficiency of plastic film wrap, performance tests may be conducted. To simulate fork truck handling, test according to ASTM D880, Test Method for Impact Testing for Shipping Containers and Systems; D4003, Methods of Programmable Horizontal Impact Test for Shipping Containers and Systems; D6055, Test Methods for Mechanical Handling of Unitized Loads and Large Shipping Cases and Crates; or D6179, Test Methods for Rough Handling of Unitized Loads and Large Shipping Cases and Crates. For guidance on the intensities and durations for these procedures, refer to Section 10.3.2 of Schedule A – Handling – Manual and Mechanical of ASTM D4169, Standard Practice for Performance Testing of Shipping Containers and Systems. To test for resistance to impact of the plastic wrap on shipping packages, use ASTM D6344, Standard Test Method for Concentrated Impacts to Transport Packages.

Substitution of Fiberboard Boxes for Packages, Bales, Bundles or Wrapped

Sec. 11. When in the separate description of articles the terms 'in packages,' 'in bales,' 'in bundles,' or 'wrapped' are referred to as a form of exterior packaging, such articles may be enclosed in corrugated fiberboard boxes. When the corrugated boxes used do not meet the requirements of Item 222, they must not bear a box manufacturer's certificate as provided for in Item 222-1.

Top-Heavy Articles

Sec. 12. Articles as tendered for shipment weighing 200 pounds or greater and greater than 48 inches in height which exhibit a high center of gravity in their normal orientation of loading for in-transit movement must be placarded on two opposite sides conspicuously displaying the following symbol as a precautionary warning:

Top-heavy articles are those having a center of gravity higher than $\frac{1}{2}$ their standing height and having a height of two times or greater of the shorter base dimensions, as packaged.

Environmental or Event Monitors, Indicators or Recorders

Sec. 13. (a) Environmental or event monitors, indicators or recorders are devices that can be placed on or within a package, handling unit or vehicle to monitor the shipping and storage environment. These devices are intended to detect if an event has occurred or an environmental threshold has been surpassed for many types of shipping conditions such as, but not restricted to, shock/impact, vibration, tilting, temperature, humidity, atmospheric pressure or exposure to light.

Sec. 13. (b) The reliability of environmental or event monitors, indicators or recorders is not always certain. Consequently, these devices might not constitute sufficient evidence of mishandling of the freight.

Articles or Containers with Wheels or Casters

Sec. 14. Articles that are tendered for shipment with wheels or casters attached, or in containers with wheels or casters attached, must be equipped with locking or retracting devices or be packaged in such a manner as to prevent movement during transportation. When tendered on lift truck skids, pallets or platforms, articles or containers with wheels or casters attached must be secured to prevent any shifting during transportation and to prevent wheels or casters from falling through the lift truck skid, pallet or platform deck.

Where Damage to the Shipping Package Will Result in a Claim

Sec. 15. Unless otherwise provided in individual descriptions of articles, when damage to the shipping package, including cosmetic damage, will result in a claim for loss or damage, such package(s) must be overpacked or otherwise protected by packaging materials sufficient to prevent damage to the package(s). See also Item 222-1, Note 6.

☐ **Freight Requiring Protection from Rust or Corrosion, or from Freezing of Internal Liquids**

☐ **Sec. 16. (a)** Articles liable to damage by rust or corrosion must be coated with rust- or corrosion-preventative compounds or preparations, or be protected by rust- or corrosion-prevention packaging.

☐ **Sec. 16. (b)** Machinery or vehicles, including aircraft, automobiles or boats, containing water or other liquid subject to freezing must be drained or have such water or liquid adequately protected by suitable antifreeze compounds or preparations.

□★26721	NOTE—Articles weighing each greater than 110 pounds must be tendered in authorized packages secured on a lift truck skid, pallet or platform.	
27320-A	Stoves or Ranges , aluminum and iron or steel combined, NOI, electric cooking, etc. ◆◆...Cancel; see item 26720. Stoves or Ranges , iron or steel: subject to item 27340	
△27414-A	NOTE—Also includes one tee joint and draft regulator combined for each stove when packaged inside stove.	
27430-A	Electric , cooking, etc. ▲...Cancel; see item 26720.	
27440-A	Disc heaters or hot plates, etc. ◆...Cancel; see item 26720.	
27442-A	NOTE—▲...Cancel; no further application.	
27450-A	Cooking, NOI, etc. ◆...Cancel; see item 26720.	
△27452-A	NOTE—Also applies on stoves or ranges consisting of separated ovens and surface cooking units designed for permanent individual built-in installation.	

ITEM	ARTICLE	CLASS
	BOILERS, FURNACES, STOVES AND RELATED ARTICLES GROUP: subject to item 25400	
	Stoves or Ranges, iron or steel: subject to item 27340	
27520-A	Gas, NOI, ♦□ other than cooking, see Note, item 27521; Gasoline, NOI; Oil, NOI, other than hand or wheel portable motor operated blower type; Gas Radiators, NOI; or Charcoal, Coal, Oil or Wood and Gas combined, NOI; see Notes, items 27414, 27452 and 27524, in boxes, crates, drums or Packages 112, 131, 972 or 1082	85
△27521-A	NOTE—One gas operating lamp attachment may be included for each stove when in same package. Provisions also apply on accompanying liquefied petroleum gas cylinders, empty or filled.	
△27522-A	NOTE—Also applies on stoves or ranges or parts containing metals other than iron or steel, provided the weight of such metals does not exceed 20 percent of total weight.	
△27524-A	NOTE—Also applies on oil stoves not porcelain enameled in corrugated fiber boxes testing not less than 200 pounds. Dimensions must not exceed 90 united inches.	
27590-A	Stoves, Ranges and Related Cooking Equipment, etc. ♦♦□...Cancel; see items 25970 and 26720.	
27591-A	NOTE—▲...Cancel; see item 25971.	
	BUILDING MATERIALS, MISCELLANEOUS, GROUP: subject to item 33570	
34290-A	Doors or Door Sections or Grilles, garage or commercial or industrial building, overhead, sliding, rolling or curtain type, NOI, ▲with or without accompanying hardware, fittings or motors, in packages, ▲see Note, item 34292 ..	125
34291-A	NOTE—▲...Cancel; no further application.	
△34292-A	NOTE—Doors or door sections or grilles tendered for shipment on lift truck skids or pallets must be securely fastened to and must not overhang the edges of the lift truck skid or pallet deck. Exposed surfaces and edges must be completely wrapped with plastic film or corrugated fiberboard or protected by wood or similar material.	
	BUILDING WOODWORK GROUP: subject to item 37500	
△37504-A	NOTE—Where reference is made to this note, provisions apply on articles of native wood, Canadian wood or foreign birch, pine or spruce, not further finished than primed.	
△37610-A	Building Woodwork, NOI, or Ships' Joiner Work, NOI, see Note, item 37504:	
Sub 1	SU, glazed, see Note, item 37612:	
Sub 2	In metal strapped bundles, glazed surfaces fully protected	125
Sub 3	In boxes or crates	100
Sub 4	SU, not glazed, see Note, item 37612, in packages	100
Sub 5	KD flat, or consisting of one piece of wood, or consisting of pieces assembled into panel form, in packages	70
37612-A	NOTE—Applies only on articles to be built in and become a permanent part of ▲building woodwork or ships' woodwork.	
38030-A	Moldings; banak, native wood (pine), obeche or virola, further finished than primed; or native wood, Canadian wood, or foreign birch, pine or spruce, wholly or partially covered with plastic other than laminated plastic; etc. ♦□...Cancel; see item 38035.	
♦□★38035	Moldings (Mouldings), with or without coatings or coverings of other materials, see Note, item 38036, in boxes or Package 2109, see Note, item 38037:	
Sub 1	Greatest dimension exceeding 192 inches, subject to Item 170 and having a density in pounds per cubic foot of:	
Sub 2	Less than 10	175
Sub 3	10 but less than 15	100
Sub 4	15 or greater	85
Sub 5	Greatest dimension exceeding 96 inches but not exceeding 192 inches, subject to Item 170 and having a density in pounds per cubic foot of:	
Sub 6	Less than 10	150
Sub 7	10 but less than 15	92.5
Sub 8	15 or greater	77.5
Sub 9	Greatest dimension not exceeding 96 inches, subject to Item 170 and having a density in pounds per cubic foot of:	
Sub 10	Less than 10	125
Sub 11	10 but less than 15	85
Sub 12	15 or greater	70
★38036	NOTE—Also applies on moldings (mouldings) made of wood particleboard or medium density fiberboard (MDF).	
□★38037	NOTE—Articles tendered for shipment on lift truck skids, pallets or platforms must be securely fastened to and must not overhang the edges of the lift truck skid, pallet or platform deck.	
38040-A	Moldings, etc. ♦□...Cancel; see item 38035.	
38041-A	NOTE—▲...Cancel; no further application.	
38050-A	Moldings, wood particleboard; covered wholly or partially with plastic film; or not covered, not further finished than primed; etc. ♦□...Cancel; see item 38035.	
38176-A	▲Stairs, SU or in SU sections, curved or spiral, with or without balustrades, in crates	300
♦♦□38180-A	Stairs, SU or in SU sections, NOI, in boxes or crates:	
Sub 1	Greatest dimension exceeding 96 inches, subject to Item 170 and having a density in pounds per cubic foot of:	
Sub 2	Less than 6	250
Sub 3	6 but less than 10	125
Sub 4	10 or greater	85
Sub 5	Greatest dimension not exceeding 96 inches, subject to Item 170 and having a density in pounds per cubic foot of:	
Sub 6	Less than 6	200
Sub 7	6 but less than 10	110
Sub 8	10 or greater	77.5
♦42460-A	Charcoal, other than animal or wood, NOI, not activated, in bags, boxes or drums	85
♦42470-A	☉Charcoal, wood, NOI, not activated:	
Sub 1	In containers in boxes or drums	85
Sub 2	In paper bags or cloth bags, or in bulk in boxes or drums	77.5

ITEM	ARTICLE	CLASS
	CHEMICALS GROUP: subject to item 42600	
◆42620-A	Acetanilid:	
Sub 1	In containers in boxes	85
Sub 2	In Package 23 or in bulk in boxes or drums	70
◆42647-A	⊛ Acids , NOI, dry, other than toxic or corrosive materials:	
Sub 1	In inner containers in boxes	92.5
Sub 2	In bulk in boxes, drums, five-ply paper bags, Item 201 bags or Packages 248, 1380, 1381, 1388, 1425, 2009, 2226, 2264, 2369 or 2395	85
◆42648-A	⊛ Acids , NOI, liquid, other than toxic or corrosive materials:	
Sub 1	In carboys	100

△100241-A	NOTE—Provisions for household goods, personal effects or military baggage apply only on second-hand (used) household or personal effects such as clothing, personal property, furniture or furnishings for residence with not to exceed one piano. There may also be included not to exceed one second-hand (used) motor vehicle. Provisions do not apply on articles of extraordinary value, nor on goods shipped for sale or speculation.	
△100244-A	NOTE—Household goods, personal effects or military baggage susceptible to breakage or having surfaces liable to damage must be protected by packing materials necessary to afford adequate protection against breakage or damage.	
△100245-A	NOTE—The following departures from packing requirements are permitted: 1. Carpets or rugs may be shipped in wrapped bundles or rolls. 2. Mattresses or upholstered box springs may be shipped wrapped in fiberboard, plastic film or quilted pads. 3. Refrigerators may be shipped wrapped in fiberboard and skidded, or wrapped in quilted pads.	
△100250-A	Household Goods, Personal Effects or Military Baggage , see Note, item 100241, moving under the U.S. Department of Defense Personal Property Program, see Note, item 100251, in boxes or crates, see Notes, items 100244 and 100245	0
©100251-A	NOTE—Pursuant to 10 USC Chapter 157, §2636a, enacted by Congress on November 26, 2003, as amended by the Department of Defense Authorizations Act for Fiscal Year 2007, Transportation Service Providers (TSPs) are required to provide Full Replacement Value (FRV) coverage to all customers of the U.S. Department of Defense Personal Property Program. FRV is defined as the greater of: (1) ◆\$7,500 per shipment; or (2) ◆\$6.00 times the net weight of the household goods shipped or ◆\$6.00 times the gross weight of the unaccompanied baggage shipped, in pounds, not to exceed ◆\$75,000. This definition of FRV does not apply on motor vehicles, including automobiles or motorcycles.	
	LAMPS OR LIGHTING GROUP: subject to item 109000	
109110-A	Flashlights, Searchlights or Spotlights , electric, ▲handheld, with power supply cord, with or without complementary battery packs, see Note, item 109112, in boxes	◆150
109112-A	NOTE—Applies only on units ▲that are designed to plug into battery packs or boat or vehicle power outlet receptacles.	
△109700-B	Lamps or Lighting Fixtures , see Notes, items 109701, 109702, 109703 and 109704, viz.: Floor Standing Lamps , with or without integral tray, also in Package 817; Fluorescent or High Intensity Discharge (HID) Lighting Fixtures , NOI, with equipment of transformer or ballast, also in Packages 220, 233, 790, 919, 1406, 2228, 2312, 2477 or 2533, see Note, item 109705; Housings , recessed incandescent lighting fixture; Lamps , artificial sunlight, heating or therapeutic; Lamps , NOI, also in Packages 794, 817, 1424, 1467, 2204 or 5F; Lighting Fixtures , NOI; Parts , lamp, lantern or lighting fixture, NOI; String Lights or Rope Lights , including Christmas or Holiday String Lights or Rope Lights ; In boxes or crates, subject to Item 170 and having a density in pounds per cubic foot of, see Note, item 109706: Sub 1 Less than 1	400
	Sub 2 1 but less than 2	300
	Sub 3 2 but less than 4	250
	Sub 4 4 but less than 6	175
	Sub 5 6 but less than 8	125
	Sub 6 8 but less than 10	100
	Sub 7 10 but less than 12	92.5
	Sub 8 12 but less than 15	85
	Sub 9 15 but less than 22.5	70
	Sub 10 22.5 but less than 30	65
	Sub 11 30 or greater	60
△109701-B	NOTE—One lightbulb (light bulb) for each socket may be included in same box with lamp or lighting fixture.	
△109702-B	NOTE—The quantity of globes, shades, reflectors or similar devices must not exceed the number required to equip the articles with which shipped.	
△109703-B	NOTE—Lighting fixtures are lighting devices designed for permanent wiring to walls, ceilings, floors, posts or other similar mountings.	
109704-B	NOTE—Does not apply on electric lighting fixtures equipped with posts or poles exceeding ◆◆96 inches in greatest dimension. Provisions for such lighting fixtures are found in ▲item 161145.	
△109705-B	NOTE—Accompanying equipment of iron or steel or plastic reflectors may be in packages.	
△109706-B	NOTE—When lamps or lighting fixtures and their complement of globes, shades or reflectors are in separate packages, the density for determining the applicable provisions must be the result of the division of the total weight of all packages by the total cubage (cubic displacement) of all such packages.	
◆109800-A	Lanterns or Flashlights , electric, handheld, NOI, with or without complement of batteries, in boxes	110
◆111180-A	Licorice (Licorice Extract) ; mass, in boxes, drums or Package 1276; or powdered, in cloth or five-ply paper bags or in boxes or drums	85

ITEM	ARTICLE	CLASS
114000-A	MACHINERY GROUP: Articles consist of Machinery or Machines, or Parts Named, ☐see Notes, items 114012, 114014 and 114018, as described in items subject to this grouping.	
△114012-A	NOTE—Shipments of machinery or machines, loose or on skids, must have small detachable parts removed and shipped in boxes or drums. Such boxes or drums must be specified on shipping orders and bills of lading. Fragile parts not detached must be protected.	
△114014-A	NOTE—Unless otherwise provided, parts or pieces weighing 50 pounds or over of KD machinery and machines maybe accepted loose or on skids and classed as in packages when such parts or pieces are shipped with the articles of which they form a part and classes are provided for such KD machinery or machines in packages.	
△114018-A	NOTE—Except as noted in individual items, motors forming an integral part of a complete machine and shipped therewith will be classed the same as the machine of which it forms a part.	
114022-A	NOTE—☐...Cancel; see Item 680, Sec. 16(b).	
114024-A	NOTE—☐...Cancel; see Item 680, Sec. 16(a).	
◆☐123820-A	Kilns , brick drying or hardening, in boxes or crates, subject to Item 170 and having a density in pounds per cubic foot of:	
Sub 1	Less than 8	175
Sub 2	8 or greater	92.5
123840-A	Kilns , enameling, or china, earthenware or pottery firing, ☐in boxes or crates, see Note, item 123842.....	◆110
△123842-A	NOTE—Finished surfaces liable to damage by other freight must be protected.	
123860-A	Kilns , iron, NOI, KD ◆...Cancel; see provisions otherwise applicable.

CARRIER BEST PRACTICES**ITEM 500100-A****▲DEFINITION OF STANDARD LTL PICKUP AND/OR DELIVERY SERVICE**

Standard LTL (Less Than Truckload) service involves freight moving from and to a business located in a commercial area where both the pickup and/or delivery can be performed at trailer-height loading docks with no specialized equipment required from the carrier. Pickup and/or delivery service is to be performed by only one person during carrier's normal business hours, without prior arrangement or notice, and should not exceed 30 minutes per pickup and/or delivery. Carrier's obligation is to deliver the freight as it was tendered to the carrier by the shipper. Services such as sorting, segregating, consolidating, deconsolidating, re-stacking or restructuring any portion of the shipment are not considered standard.

MODEL AGREEMENTS**★ITEM 600100****MODEL TRANSPORTATION CONTRACT**

NMFTA has developed a Model Transportation Contract designed to set forth sample terms and conditions for transportation services or arrangements provided by a motor carrier to a shipper or broker. The Model Transportation Contract is available for use exclusively by motor carriers participating in the NMFC. For more information, please contact NMFTA Customer Service at customerservice@nmfta.org or 866-441-6632.

★ITEM 600200**MODEL MOTOR CARRIER INTERLINE AGREEMENT**

NMFTA has developed a Model Motor Carrier Interline Agreement designed to set forth sample terms and conditions for agreements between motor carriers handling interline shipments. The Model Motor Carrier Interline Agreement is available for use exclusively by motor carriers participating in the NMFC. For more information, please contact NMFTA Customer Service at customerservice@nmfta.org or 866-441-6632.

★ITEM 600300**MODEL NON-DISCLOSURE AGREEMENT**

NMFTA has developed a Model Non-Disclosure Agreement designed to set forth sample terms and conditions for agreements between a motor carrier and a shipper or broker to not disclose proprietary information each party deems confidential. The Model Non-Disclosure Agreement is available for use exclusively by motor carriers participating in the NMFC. For more information, please contact NMFTA Customer Service at customerservice@nmfta.org or 866-441-6632.
