

# BIOREPOSITORY SERVICES

## BIOREPOSITORY SERVICES

Alliance Pharma provides secure, reliable, flexible, and scalable biorepository services for both short-term and long-term storage. All stored samples are inspected and verified upon receipt, properly tracked, and quickly retrievable for testing, shipping, or disposal.

### Examples of Sample Types

- Clinical and nonclinical trial samples (Phases I, II, III, and IV)
- Active pharmaceutical ingredients (APIs)
- Pharmaceutical medicinal products (chemical drugs and biologics)
- Proteins, antibodies, and DNA
- Whole blood and derivatives (plasma, serum, peripheral blood mononuclear cells [PBMCs])
- Bodily fluids (urine, saliva, cerebrospinal fluid)
- Tissues and organs—Mammalian and human
- Cell lines
- Soils
- Plants
- Controlled Substances
- Radioactive samples

### Security and Reliability

- Electronically controlled entrances and exits to the facility
- 24/7 Monitoring of facility alarm systems
- Restricted access to storage units
- Continuous temperature monitoring of storage units
- Backup power generation capabilities
- Disaster recovery plan

### Flexibility and Scalability

- Customizable service plans
- Wide range of temperature-controlled storage conditions
- Individualized on-site storage capabilities using multiple storage units
- Ample room for additional storage requirements
- Domestic and International shipping services

### Temperature Controlled Storage Conditions

- Room temperature
- Cold temperature (4°C and –20°C)
- Ultra-low temperature (–70°C and –80°C)
- Liquid nitrogen (–190°C)
