

Tic Tac Toe Toss

Need: one muffin tin (three of the top cups covered with a piece of construction paper with Tic Tac Toe Toss written on it and taped on the muffin tin), several pieces of 2 different colored scrap paper balled up, chair, chalk board, chalk

Directions: Divide the class into 2 teams and give each team some colored scrap paper that is balled up (one team receives one color and the other team another). Place a muffin tin about 4 to 6 feet from the chair (distance according to age of students). Ask a player from one team a question about today's lesson. If they are correct the student stands behind the chair and tosses their balled up paper at the muffin tin. The teams plays tic tac toe against one another using the muffin tin as a game board. If the ball of paper goes into a cup, that team has that space and tries to make three in a row. If the ball of paper does not go into a cup, they forfeit their turn. If the ball of paper goes into a cup that already has a ball of paper inside, their team now has that space. Alternate asking questions between the teams so each player gets a turn. Continue until a team gets three in a row. Give that team a point and repeat game as time allows.
