

Manufacturing excellence

We manufacture at seven centres of excellence on four continents. Here we aim to maintain stable and flexible operations, to manage fluctuations in demand or product mix.

We continue to invest in these manufacturing capabilities, with more than half of our capital expenditure being spent on new machinery and equipment. We also work closely with our manufacturing partners to ensure high quality products and efficient delivery.

Each site maintains strict international standards – with all our main manufacturing sites having OHSAS18001 certification for their health and safety management systems.

We assure quality through ISO standards and common working practices across all operations. These have established De La Rue as a beacon of manufacturing excellence. Our plant in Kenya is the only site in Africa to have achieved ISO14298 – the highest possible level of secure printing accreditation.

Suppliers and partners

We depend on our suppliers for timely and cost effective delivery of high quality components for banknotes, ID documents and authentication labels. We secure these supplies through strong and long-lasting relationships with trusted suppliers, all of whom we expect to comply with our ethical and environmental standards and our Code of Business Principles.

We recognise the value of close partnerships, and work with our industry's leading suppliers to encourage innovation that leads to benefits for society at large.

For example, we operate technical partnerships with ink suppliers and manufacturers of printing equipment to develop secure print features and identify efficiency savings.

We also work with our manufacturing and commercial partners to ensure we provide the best quality products and services to our customers. Just as suppliers and partners support our aims, so we support theirs – sharing best practice in order to boost efficiency and achieve common goals.
