

## HolaDoctor: Eliminating Spreadsheets, Manual Processing, and Duplicate Data Entry with SAP Business One®

For 15 years, HolaDoctor has connected with the Hispanic community and informed its members about health insurance, access to care, healthy living, and early detection and aggressive management of chronic illnesses. HolaDoctor is the most comprehensive Spanish-language health and wellness digital network available today. HolaDoctor identified the need to have software that would enable it to track customer prepayments and project costs. It also needed help with revenue recognition, eliminating the spreadsheets it was using, and integrating time and expense reporting capabilities. Additionally, HolaDoctor wanted software that would meet the requirements of project and cost accounting required to be awarded government contracts.

HolaDoctor turned to the SAP Business One® application, with implementation support from I-Business Network. Now everything is integrated at the customer level, and HolaDoctor has the ability to view information in a single location. SAP Business One has integrated time and expense reporting capabilities, which has eliminated a lot of manual processing and duplicate data entry. Now HolaDoctor can focus on serving its customers and helping them lead healthy lives.
