I-BN Cloud Hosting

Competitive Advantage Without the Capital Investment

I-Business Network is a leading Application Service Provider offering technology and support in a hosted environment at a predictable monthly cost. Outsourcing your hardware and giving your IT personnel less to worry about freeing your company from expensive technology, managing upgrades, and reducing labor costs.

- Anytime, anywhere access
- Powerful technology
- High-end servers and infrastructure - continually upgraded
- Experienced professionals who know your software and can work with your software consultant
- IT specialists to maintain systems

Custom Cloud Environments

If you need your infrastructure on the Internet for e-Commerce, mobile access or simply to outsource part or all of your IT infrastructure, I-BN provides custom cloud environments or "Infrastructure as a Service" sized to your specifications and scalable on demand.

Cloud ERP

Utilizing the I-BN private cloud can both reduce the costs of your ERP system and extend it beyond your walls to multiple sites, traveling professionals, and your supply chain. Our Start & Grow℠ implementation process reduces your time, cost, and risk of implementation.

Bring Your Own Software

I-BN specializes in hosting ERP applications utilizing Microsoft technologies. Whether those applications are traditional client server applications that require web enablement or web native applications such as .NET, I-BN is your choice for a secure private cloud platform.

Cloud Collaboration and Email

Connect with your employees and business partners, from the office or road with cloud based e-mail, calendaring and document folders accessible from your PC, notebook, netbook or mobile device.

About I-Business Network

Established in 1999, I-BN's executive management profile includes years of corporate and Big 6 experience. Our consultants have expertise in a wide range of industries and our IT staff keeps current on the latest technologies. Our greatest strength is our ability to deliver a national network of partners to provide local services and specialized knowledge.

I-BN is customer focused with the goal of matching the right business management tools with company requirements, deployed on-premise or in our private cloud, and financed via subscription, purchase, capital or operating lease. I-BN strives to transfer knowledge to its customers and partners to improve their productivity and business effectiveness.
