

FOR IMMEDIATE RELEASE

DP SOLUTIONS HELPS BUSINESSES BEAT IMPORTANT TECH DEADLINE

COLUMBIA MD, June 4, 2013 - The end is quickly approaching for Microsoft Windows XP* and Office* 2003. Microsoft will end support of these products by April 8, 2014. DP Solutions is ready to help businesses beat this deadline and avoid the risks of depending on an unsupported OS and software with a range of new business-grade Intel® architecture-based PCs and devices.

Upgrade to the right tools for the job

Devices have transformed dramatically in the last year and offer quantum leaps in performance and features over 3- to 4-year-old machines. In addition, older devices experience greater failure rates, lost productivity and downtime, and in many cases, can be more expensive to support and maintain than to replace with new hardware.

Now is the ideal time to refresh aging PC fleets with new All-in-One PCs, Ultrabooks™, and tablets that equip employees with the machines best suited for their jobs. New devices provide fresh capabilities such as touch, increased levels of mobility and performance, and built-in security.¹

Close the mobility gap

While employees enjoy a mobile lifestyle in their personal lives, at work they report that nearly 80 percent of enterprise computers are still desktops.² Moreover, stationary computers don't effectively support today's mobile work styles, while touch is becoming an increasingly important capability for many types of workers. As a result, more and more employees fill the mobility gap by working on laptops, tablets, and smartphones that they purchase themselves. Unmanaged employee-owned devices can introduce serious security and manageability threats and IT organizations may be unaware of the many unauthorized devices accessing their networks.

New touch-enabled Ultrabooks™ and tablets give users the improved productivity of mobility and include the next-generation features that they demand—combined with the performance, built-in security, and manageability required for business and IT.^{1,3}

The time has come to upgrade the aging PCs in your fleet with the kinds of innovative devices that employees want—yet are built on the proven, secure, and compatible Intel architecture foundation.

Learn more

DP Solutions is ready to help your business navigate a hardware refresh and choose the best Intel processor-based devices to move to Windows 7 and 8. Learn more at:
