

# Futures Science

# Coatings Ambassadors

Coatings Ambassadors are industry professionals who are trained to engage, inspire and enthuse young people into careers within the coatings industry. They form part of the Science Industry Partnership (SIP) Ambassador network and work with young people, parents, teachers and careers advisers to promote STEM based careers through visits to schools and colleges and attending careers fairs. They enthuse young people with their knowledge and provide a unique insight into the world of work.

## Why become a Coatings Ambassador?

- Receive training to develop your science careers knowledge
- Challenge the stereotypes associated with working in science – share your story!
- Promote the breadth of careers available in the coatings industry
- Develop knowledge, confidence and skills in delivering engaging group activities
- Build knowledge of successfully planning activities that inspire young people.
- Promote your company’s career opportunities and inspire the future workforce
- Join the network of 500 SIP Ambassadors
- Have fun while giving something back

## The training

- Interactive hands-on session
- Practice delivering activities with constructive feedback to build confidence
- How to work with and inspire young people
- Tailoring outreach to different ages, abilities and timings
