

WHITNEY CURETTES™

WHITNEY
Has 4 Great Tips For You!

The best ways to safely work with bone cement.

During Hip or Knee Replacement Use No-Scratch™ Whitney Currettes™

Safer Than Steel

Made of plastic—sturdy yet softer than surgical steel.
Reduces the risk of marring the prosthesis.
Helps reduce micro-scratches on the joint surface.

Handier

Each tool has a molded in-thumb indentation instantly orienting the tool.
Easy to maneuver in hard-to-see places.
Color-coded for easy identification.

Faster

Comes individually packaged in sterile, peel-open pouch ready to go.
Applies, manipulates, or removes cement with finger tip precision.

Economical

Saves time and money.
Disposable—no need to waste time removing hardened cement or resterilizing tool.
Less expensive to buy and inventory—order only the tool you use.
Packaged 25 individually wrapped tools to a carton for convenient shelf storage.

AVAILABLE IN FOUR STYLES

Sterile tools individually packaged in cartons of 25.
Carton dispenses tools individually.
Volume discounts available.
