

Identity Manager 4.7 Advanced Administration

Course Number	Course Duration	Course Level
3168	4 Days	Intermediate

The purpose of this course is to enable NetIQ Identity Manager administrators to perform advanced administrative tasks using Identity Manager 4.7. The course provides instruction and hands-on experience with tasks such as installing NetIQ Identity Manager Applications, configuring self-service password reset, using the User application, and creating a roles structure.

In addition, students learn how to use the reporting module, access review with IDM, and customize the IDM Role Member report.

Audience Summary

This course is designed for students who have a basic Identity Manager administrative skill set and knowledge, and want to enhance their administrative skills.
