

COACH HOUSE

*Best Practice for Safe Practice*

# HELPING EDUCATION ESTABLISHMENTS RECOVER FROM THE COVID-19 CRISIS

With a longstanding mission to engage more people in music making, we recognise that as a result of the recent COVID-19 Crisis it is important that this can continue in a way that is safe to pianists.

We have developed a variety of unique Music Department Solutions that mitigate the transfer of harmful bacteria and viruses via the keyboard of a piano:

- Forte Protect
- Sanitiser Solutions
- Piano Key Wipes
- Protective Teaching Screens
- Safe Cleaning Chemicals
- Deep Cleaning

# FORTE PROTECT

Unique to Coach House, designed specifically for Music Departments to locate next to every piano:

- Instant set-up, ready to use
- Large hidden sanitiser canister that is locked away.
- Cost effective at only 2p per application. 12,000 shots per canister
- Ensures no stolen or moved hand gel bottles
- Simple and fully mechanical, no electronics
- Integrated PianoWipe dispenser (see page 6)
- Robust design (Dims 500 x 500 x 1200mm) Junior options available upon request
- Wall fixing options or lockable castors

FORTE PROTECT

# SOLO STATION SANISTISER

Ideal for corridors, reception areas and department entrances. Fully automatic

- Very cost effective free-standing sanitising station
- Touch free with automated dispensing via sensor
- No mains power required – batteries last 3 years or 25,000 applications, whichever comes first
- Comes with 1 litre of alcohol hand gel
- Can be co-branded with your school logo

# HEXAD SANITISER STATION

Introducing a robust yet cost effective floor standing option:

- Heavy duty foot pedal operated hand gel dispenser tower
- Zintec steel powder coated
- Holds a total of 30,000ml across 6 x 5L bottles
- Long Lasting hardwearing heavy-duty foot operation
- Dispenses only a single dose sufficient for sanitising your hands and allowing them to dry quickly
- H1085 x W306 x D600mm

## FLOOR STANDING SANITISERS

Introducing a simple, cost effective floor standing option:

- Non-touch system that is foot operated
- Brushed stainless steel finish or black (height 1000mm)
- Simple and fully mechanical, no electronics
- Durable and robust
- Free standing design (easy to fasten to the floor)
- Includes 1 litre refillable bottle

## WALL MOUNTED OPTIONS:

Wall mounted Push  
Dispenser with 1 litre  
of gel.

Premium wall  
mounted Automatic  
gel dispenser with  
1100ml of gel.

Wall mounted Auto  
Dispenser with 1 litre  
of gel.

# BRANDED FACE MASKS

*Soft cotton face masks that are washable.*

- Junior sizes available
- Comfortable to wear
- Washable and reusable
- Custom branded with your school logo
- Available in a range of colours. Colour co-ordinate each day so you can see who is wearing a clean mask

# PROTECTIVE TEACHING SCREENS

Many one-to-one piano and instrumental lessons take place in small practice rooms where maintaining the required social distance is impossible.

The partition screen can be used to create a protective barrier between teacher and pupil.

- Powder coated aluminium frame
- Light weight but solid construction
- Easy self-assembly with no tools required
- Removable anti-microbial screen for easy cleaning
- Free standing design with easy portability
- Bespoke sizes and finishes available

Standard sizes:  
1x2m, 1.5x2m and 2x2m

# THE ORIGINAL PIANO KEY WIPE

Most chemicals are very harmful to the surface of piano keys and other musical instruments.

Introducing the original and only safe piano wipe; formulated in association with the Piano Wipe Company. This wipe removes 99.999% of bacteria and viruses from the keyboard. To use, students tear open a single wipe packet, and clean each key on the piano. 1 sachet is sufficient to clean an entire keyboard prior to use.

It is also advised that students clean the keys following the use of the piano.

# SAFE DISENFECTANTS

With concerns raised by many music departments that cleaners are now being more liberal with disinfectant sprays near and on instruments, we're introducing oXan.

oXan is a unique disinfectant that can be used on all surfaces and provides a residue-free removal of microbiological contamination:

- Effective against bacteria, fungicide, spurs, virus, algae
- pH neutral
- No bacterial resistance
- Polutant-free and free of dangerous substances
- No cytotoxicity
- No phytotoxicity
- Does not contain solvents, alcohols or aldehydes
- Does not harm if in contact with eyes, skin and mucous membranes
- Safe for use on any surface (including piano casework)

# SANI360 BY COACH HOUSE

SANI360 by Coach House is a specialist Music Department and School Hall cleaning service giving schools piece of mind, knowing that their building has been thoroughly cleaned without causing damage to musical instruments and other valuable assets.

Working alongside leading chemical manufacturers and cleaning professionals, we use a range of products that are safe and effective.

Pricing is calculated on a room by room basis.  
From **£220+VAT**

## TEMPERATURE SCREENING CAMERAS

The purpose of this system is to identify persons with possible EBT (Elevated Body Temperature) who may require further medical testing and therefore prevent the potential spread of infection.

Key points on following slide.

# TEMPERATURE SCREENING CAMERAS CONT.

- Accurate, efficient and easy-to-use EBT-screening
- Visual-light and infrared imaging cameras designed for detecting elevated skin temperature
- Measure temperatures accurately and in real-time
- Optimised for busy, indoor environments
- Non-contact measurements
- Alarm function with audio alert
- High sensitivity sensors
- Different lense sizes depending on installation location

This product is setup and installed by a professional third-party installation team.

Pricing is based on each school's individual requirements. Please contact us for more information.
