

## We care about your eyes

Although your glasses have been created with the utmost care and include a protective coating, they are still vulnerable. It is important to handle and clean them carefully.

### Handling tips

- Always use both hands to put on your glasses or to take them off
- When you hold your glasses in your hand, hold them at the bridge, not by the legs
- Keep your glasses in the special hard case provided by your optician
- Do not put your glasses down on the curved side of the lenses
- Be careful with heat. Do not put your glasses down on heat sources such as ovens or hot surfaces and do not leave them in the car when it is extremely hot outside

100% personalized.  
100% state-of-the-art

## 100% State-of-the-art

Do you experience problems focusing at a range of distances but find that traditional progressive lenses cause unpleasant blur and distortion? If so, then Hoya's award-winning MyStyle 2 lens is the right choice for you!

Produced with the latest advancements in lens technology, MyStyle 2 is Hoya's most advanced premium progressive lens available today - It takes into account all the variables that are specific to you!

Experience an unprecedented level of individualization and clear, stable vision, every time and everywhere.

## Tailored specifically for you

Your progressive lenses can be customized to your exact needs. Hoya has conducted extensive research into perfecting its progressive lenses. The latest developments concentrate on stable image processing, especially while you are moving around, minimal distortion, comfortable vision at all distances and seamless transition between near, intermediate and far. The various correction areas of the lens blend smoothly into each other, so your eyes move easily from one focal point to another.

## Discover MyStyle 2

See the difference personalized lenses can make:

- 100% personalized lens that is easy to adapt to
- Natural, stable, crystal-clear vision
- Smooth and natural transitions from near to far
- Wider viewing zones
- Incorporates Hoya's Binocular Harmonization Technology™ (BHT) for perfect and effortless focus, constant stability and excellent depth of vision

Just like our **fingerprints**, every eye is **different and unique**

MyStyle 2 is the most **personalized** lens design available today!

## Get fitted today!

During your consultation and eye exam, your optician will collect all the information relevant to your personal vision profile. This includes not only your prescription but also your previous lens experience, the way you wear your frame and your lifestyle preferences.

Hoya will incorporate all this information into the design and manufacturing of your new premium progressive lenses, ensuring optimal vision at all distances.
