AGENDA

- I. Welcome & Safety Moment – Gary Tellish, Division Chairman
- II. National Safety Council Update
- III. Division Updates/ New Business – Gary Tellish, Division Chairman
 - Excavation Campaign
- IV. Division member success story
- V. Presentation: “Using the right metrics to evolve your safety program”.
Presenter: Matt Law, MPH, CSP, REHS, Field Safety Specialist, W.W. Grainger, Inc.
Description: The easiest metrics to capture in any safety program are the consequences of failed controls. Incidents, injuries, property damage, etc. are all very easy to track, and some are even required to be reported to OSHA. However, these “lagging indicators” are reactive, and can only tell you so much about where to focus your efforts in improving your safety program. In this webinar, we’ll discuss how to approach safety proactively using “leading indicators”, how to capture them, and how to use them to develop an effective culture of safety in your workplace.
- VI. Upcoming Events and Meetings
 - a. [2018 NSC Congress & Expo](#), October 20-26, George R. Brown Convention Center, Houston, TX. Construction & Utilities Division Meeting & Events, Sunday, October 21.
 - b. Next Division Conference Call/Webinar - November 14, 2018
