

[Press Release]

Medit and Straumann Group Announce Strategic Partnership

[Seoul/Korea, Republic of – April 22, 2019] Medit, a provider of high-precision 3D scanning solutions, announces a strategic partnership with the Straumann Group, a leading global provider in esthetic dentistry. Medit has been continuously strengthening its presence in the dental industry and has launched a series of dental scanners, including the T-Series tabletop scanners and the i500 intraoral scanner.

The Straumann Group initiated the partnership with Medit to widen its portfolio of scanning equipment. Medit was chosen due to its experience of manufacturing state-of-the-art 3D measurement technology for decades. Over a series of tests, the Medit T-Series showed excellent results in terms of speed, accuracy and precision.

The agreement provides the Group with distribution rights for Medit T500 and T300 lab scanners, which will be fully integrated in the Straumann® CARES workflow, with the Group's endorsement.

In addition to distribution rights, this strategic alliance will also integrate the workflow between Medit's open collaboration platform, Medit Link, and Straumann's open CAD/CAM software platform, DWOS, which Medit endorses. This enables both Medit and Straumann users to seamlessly run the T-Series and the i500 scanners directly from DWOS through Medit Link.

Minho Chang, Founder and CEO of Medit, said, "We are pleased and proud to announce the partnership with the Straumann Group, a world-renowned corporation in the dental industry. Medit's scanners have been highly appraised for their excellent performance and superb quality in the dental industry. With the integration of DWOS, we are excited to be able to provide a more convenient workflow for our clients

Medit T-Series and Medit Link

The Medit T-Series is a range of user-friendly tabletop scanners that generate high-performance outcomes for both the lab and dental practice. Its fast scan engine, along with a highly efficient software algorithm, works with high-definition dual cameras in order to enable the highest quality scans with intricate details. This is due to the T-Series' ability to capture scans quickly with high accuracy and precision. The T500, for example, can scan a full arch in 12 seconds and eight dies within 19 seconds, with an accuracy of 7 microns, as per the international standard ISO 12836.

T-Series allow for a modelless workflow, from scan to design, for the production of prosthetics, leading to increased efficiency for users. Its open system enables users to export and transfer files in STL format at any point during the scanning process for the convenience of users.

Medit Link is an open collaboration cloud platform for dental clinics and labs which enables users to seamlessly manage and exchange scan files in STL / OBJ / PLY formats. Users can also operate CAD/CAM software, manage orders, make and receive payments, and use its real-time communications tool for the most optimal digital dentistry workflow experience.

DWOS

DWOS is one of the most flexible and powerful CAD/CAM software platforms available for the design of dental restorations. It offers an open and integrated ecosystem of technologies that work together to boost productivity and efficiency for dental professionals. **DWOS Chairside** uses the latest innovative technology and special design tools to facilitate the in-office design of highly-esthetic restorations, including inlays, onlays, full contour crowns, veneers, and implant abutments.

***About Medit**

Medit specializes in 3D measurement and CAD/CAM solutions for dental clinics and labs, including intraoral scanners. It also develops platform solutions for digital dentistry, supporting collaborative workflows. Additionally, the Solutionix line provides 3D scanners and software to the industrial market.

Medit is headquartered in Seoul, South Korea since its inception in 2000. The company also has representatives located in the Americas and Europe and boasts a global network of distributors in over 70 countries.

***About Straumann**

The Straumann Group (SIX: STMN) is a global leader in tooth replacement and orthodontic solutions that restore smiles and confidence. It unites global and international brands that stand for excellence, innovation and quality in replacement, corrective and digital dentistry, including Straumann, Neodent, Anthogyr, Medentika, ClearCorrect, Dental Wings, and other fully/partly owned companies and partners. In collaboration with leading clinics, institutes and universities, the Group researches, develops, manufactures and supplies dental implants, instruments, CAD/CAM prosthetics, biomaterials and digital solutions for use in tooth replacement and restoration or to prevent tooth loss.

Headquartered in Basel, Switzerland, the Group currently employs more than 6000 people worldwide and its products, solutions and services are available in more than 100 countries through a broad network of distribution subsidiaries and partners.
