Entando Innovation Labs
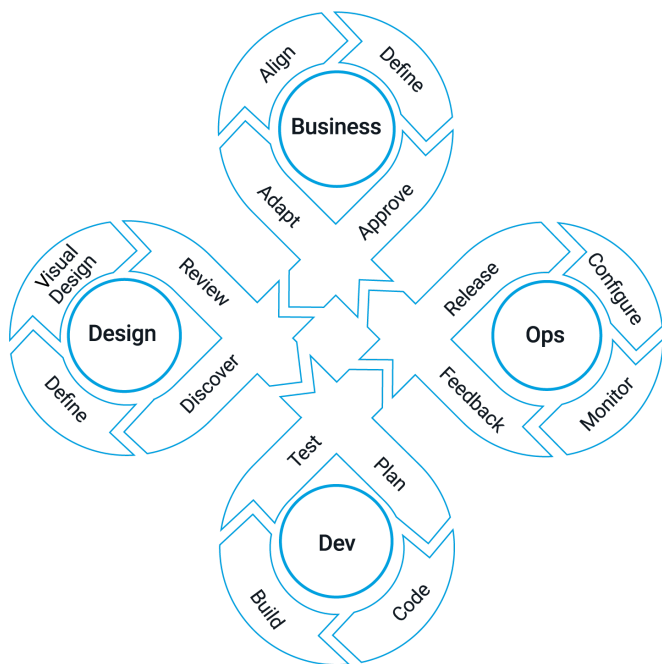

Entando Professional Services Packages

Last updated: 2022-07-06

Entando is the leading application composition platform for building enterprise web applications on Kubernetes.
Entando Professional Services can position your team to reap the benefits of Entando by recognizing your technological challenges and driving decisions to fast-track project success. Our team will review and validate your design to identify potential risks and optimize a modular solution. We will guide you on your digital journey, supporting all aspects of your business with the latest industry insights and recommendations to accelerate growth.

Standard 2-week and Optional 4-week Innovation Labs provide:
- A customized, working proof of concept (POC)
- Details of Entando's Kubernetes-native infrastructure
- A CI/CD development pipeline to deploy an Entando Bundle in your environment
- A robust methodology to design, manage and deploy apps on Kubernetes
- Production-ready code in a containerized app built from packaged business capabilities (PBCs), micro frontends and microservices
- A reference architecture template to create modern apps on Entando
- A summary document with methodology recommendations and Kubernetes best practices
- (4-week package only) Hands-on support to expedite development of modern frontend applications that capitalize on modularity and reusability

Deliverables:
- A clear assessment of your business objectives and existing digital landscape
- A strategy to overcome the technological challenges you face
- Expert guidance in executing an optimized Entando upgrade
- Comprehensive support fortified with best practices and specialized industry expertise

Get your project up and running quickly

At Entando, we understand the importance of completing your project on time. This package delivers a POC created for your environment and prepares your team for componentized development on Kubernetes. The standard 2-week Innovation Lab is designed to fast-track your team's completion of a viable POC. For extended in-person support during the first phase of your project, upgrade to our 4-week Innovation Lab.

A new way of doing things requires new processes

With Kubernetes orchestration, you can fully automate the scaling, scheduling and monitoring of containerized applications in production. PBCs based on Entando Bundles empower parallel development teams to independently release on the same codebase. Combining the two, Entando Innovation Labs simplify app development to ease the transition from a monolithic architecture and showcase the benefits of a Kubernetes-native modern stack. The Entando Platform provides a standardized methodology for app composition using PCBs, micro frontends, microservices and other modular components.

About Entando Professional Services

Entando Professional Services collaborates with customers to foster the success of their digital evolution. Entando comprises a global team with extensive experience in a variety of industry sectors including telecommunications, e-commerce, travel and digital entertainment. We will guide you through critical milestones and decisions, alleviating pain points and supporting or assuming ownership of governance, architecture, infrastructure, delivery and training.
