

MEET HUMIO!

The most powerful and affordable on-premises log management solution for security and fast incident response. Instantly detect anomalies with live searches and do real-time (live) monitoring of all of your data in a single place.

Get to the heart of the problem

Humio supports flexible and ad-hoc, free-text search and correlation with a powerful search language.

Alerts

Live alerts trigger instantly as events occur. Define notifications via email, Slack, VictorOps, PagerDuty OpsGenie or via API.

Efficient scaling and pricing for easy ingestion of TB+ data volumes

Deploy Humio where your data lives. An avg. of 10x compression enables a single node to handle up to 1 TB/day ingest. Unlimited ingestion site license pricing available.

Full Observability and Live Monitoring of your data

Perform instant searches and easily customise live dashboards, visualising metrics, log data, and other data sources in one single place.

30 DAY TRIAL - CLOUD OR DOWNLOAD
AVAILABLE - SIGN UP TODAY!

SEND ANY DATA TO HUMIO AND SEND HUMIO DATA ANYWHERE!

Integration Options

Humio understands both structured and unstructured log formats and can parse it at ingestion or search time.

- No agents to install: Send data via our API or with any of the battle-tested integrations (ie: Filebeat, Fluentd, Kubernetes, Mesos, Logstash)
- Robust API for getting data in and out easily

FREE

- 2GB/day
- 7 days retention
- 1 user
- Community support

PRO: HOSTED/CLOUD

- Hosted: We manage it for you in our cloud
- Customised retention
- Secure data transfer

Pro: AWS

- Deploy our On-Premises solution as a Docker Container on your own cloud
- AMI Available

PRO: ON-PREMISES

- Pricing based on ingest volume/day
- Site license pricing available: Unlimited data volume at fixed price
- Cluster support
- No limit on nodes or users

* Customisation available
