

Focus on your practice...while we focus on managing your software and service.

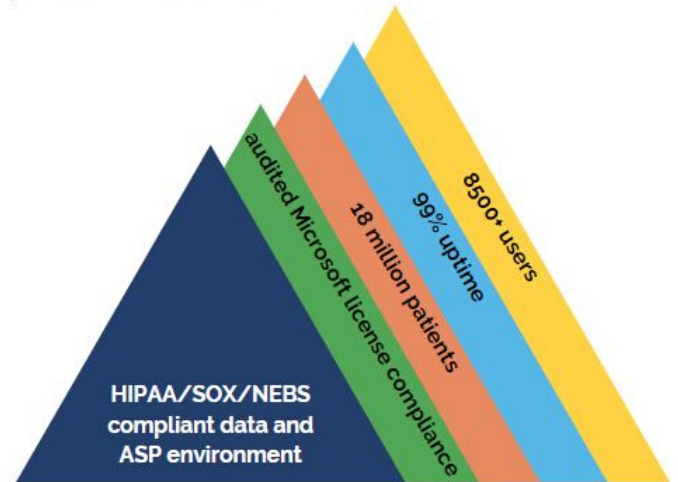

In today's busy medical practices the inability to access patient data due to server downtime (or any other reason) is not just "bad business" for your practice, it could impact patient safety, and that's never acceptable.

At Quatris Healthco we know the importance of protecting and having access to patient data when needed, and we have the expertise to manage your athenaPractice servers data maintenance and security. Using our Cloud service means you won't have to worry about uptime, updates, or even cyber thieves looking to steal your practice's data.

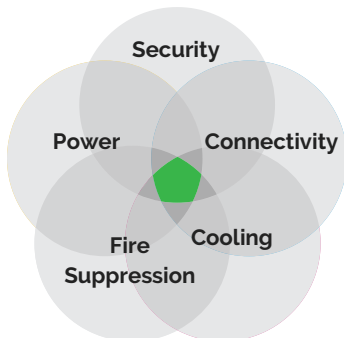

Our Comprehensive Secure Cloud Services

- **Improve System Performance** - Balances and monitors load times to deliver peak performance.
- **High Availability and Uptime** - Remote backups and built-in redundancy provide industry gold standard 99.9% uptime guarantee.
- **Proactive Maintenance** - Manage all critical athenaPractice maintenance and update tasks so you can focus on patient care.
- **Disaster Recovery & Increased Security** - Redundancy ensures your systems operate in the event of an unexpected outage. Our Centers are monitored 24/7/365 by certified network engineers.
- **Cost Effective** - Substantial cost savings over running your own network and no capital acquisition costs.

Protect your Patient Data with Quatris Healthco Cloud Services

Data Center Life Support

Our ONE Monthly Fee Includes:

- Server installation, maintenance, upgrades, service packs, KB updates and more are performed on-line without interruption.
- athenaPractice licensing costs are blended into the monthly hosting cost (medical practice does not own the licenses).
- Live customer support
