

# Reimbursement Analytics

## FOR athenaPractice™

## Reimbursement Analytics

Empower your practice to track, measure and manage your data to optimize operational and financial performance.

Healthcare providers are continually challenged by decreasing reimbursement rates, claim denials, the mandate to improve productivity, and the need to control costs.

Reimbursement Analytics offers organizations the tools and insights that can help inform more strategic decisions and improve the financial health of your practice. With near real-time access to actionable reimbursement and productivity metrics, proactive email alerts and simple deployment, Reimbursement Analytics enables you to quickly identify and respond to changes in an increasingly competitive market.

### Optimize operational and financial performance.

**Actionable Financial Management** - Reimbursement Analytics provides actionable current and historical information to help you identify and address factors driving claim denials, reimbursement delays and other issues impacting the financial health of your practice.

**Comparative Analysis** - Reimbursement Analytics helps your practice stay proactive and aware by empowering you to benchmark your performance with peers in your specialty on a state and national level. With daily updates and near real-time analytics you can access to benchmark data.

**Enterprise Data Mining** - Reimbursement Analytics enables you to identify historical trends and patterns with comprehensive views of data. Drill-down intelligence helps identify and isolate roots causes enabling future corrective action.

**Simple to Deploy** - Reimbursement Analytics provides the near real-time business intelligence required to help you optimize profitability, reduce costs, and gain insight into trends in a changing, challenging market. Reimbursement Analytics is an Analytics-as-a-Service application and requires minimal training, no hardware investment and no IT management.

### Empower Your Practice

**Track** denials to help improve the speed of your revenue cycle.

**Measure** and analyze billing and collection trends to help optimize profitability.

**Manage** and streamline processes to improve staff efficiencies and realize faster reimbursement.
