

ezReminder

FOR athenaPractice™

Increase efficiency and reduce costs with ezReminder

Send email, text or phone reminders and stay connected with your patients.

ezReminder is a HIPAA compliant two-way automated communication solution that provides your practice with the ability to stay connected with patients. ezReminder enables the practice to send and receive messages via phone, text, email, or secure message.

Two-way secure message communication is useful for reminding patients of upcoming appointments, sharing test or lab results, notification of recalls, sending alerts, and much more.

ezReminder is fully automated and integrated with athenaPractice. Patients can respond with the touch of a button, and documentation is recorded in athenaPractice. Responses can update appointment status, notes, activity logs, OBS terms, flags, and more.

ezReminder helps you do it all

- Secure Messaging
- Recall Reminders
- Appointment Reminders
- Billing Reminders
- Clinical Reminders
- Population Health Management
- New Statement Alerts
- Bulk Messaging
- Medication Reminders
- Patient Surveys
- Collection Services
- Custom Reminders

Custom reminder ideas:

* Encourage your patients to get a flu shot.

* Let patients know when the practice will be closed.
