MAINTENANCE STOREROOM & MATERIALS MANAGEMENT

Virtual Interactive Instructor-Led Course

People and Processes

RELIABILITY & MAINTAINABILITY CENTER

RMIC® Approved Course

A well-functioning maintenance storeroom and materials management process is critical to many organizations' success, especially in a manufacturing environment. Often the storeroom processes and goals are not aligned to support the maintenance needs. Yet, the storeroom is directly impacted by how the maintenance function operates within the organization.

The challenge is to strike a balance with stocking strategies provide the right materials in the right quantities at the needed time while optimizing the physical footprint and inventory costs as examples. Enroll in this three-day course, and interact with other attendees in an instructor-led virtual experience to gain a comprehensive understanding of how to properly implement and execute a proactive storeroom and materials management approach.
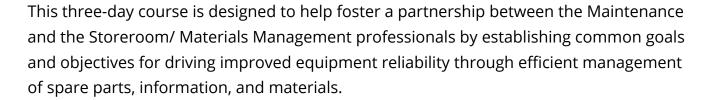

Why Virtual Interactive Instructor-Led Learning?

- No travel costs incurred
- Interact directly with your instructor
- Have questions answered immediately
- Breakout sessions with peers
- Interactive exercises to enhance learning
- Built-in games to make your learning experience fun

This virtual interactive instructor-led course is NOT just a standard course presented as a webinar. This virtual course is a truly interactive experience that gives you the opportunity to network with your peers through course breakout sessions, built-in exercises and enhanced learning.

MAINTENANCE STOREROOM & MATERIALS MANAGEMENT

Why Register?

This three-day course is designed to help foster a partnership between the Maintenance and the Storeroom/ Materials Management professionals by establishing common goals and objectives for driving improved equipment reliability through efficient management of spare parts, information, and materials.

In contrast with finding the "hidden plant" with respect to capacity through improved equipment reliability practices, the Storeroom/ Materials Management area is the "hidden investment" where millions of dollars spare parts and consumables are stored, often without the benefit of the industry recognized "Best Practices" for improved efficiency.

This 3-Day Training Will Include

- The Proactive Materials Management Environment
- Materials Management Tools
- Vendors and Vendor Ratings
- Refurbish / Rebuild Processes
- Material Management Metrics

- ABC Identification and Utilization
- Storeroom Configuration and Control
- Issue and Receiving Processes
- Spare Parts Storage and Care
- Spare Parts Utilization and Control
- Standard Operating Procedures

Expect More from People and Processes, Inc.

People and Processes' virtual interactive instructor-led courses offer a truly unique learning experience. The virtual interactive environment allows our dedicated practitioners to customize the trainings to fit your needs, while using a hands-on training approach. At People and Processes, Inc. we work tirelessly to provide you with real-world solutions, leading you to be more successful when you put your training into action.

Continuing Education (CEU's): Once you have successfully completed this course, you will be rewarded 2.1 CEUs from the University of Tennessee Reliability and Maintainability Center.

Cancellation/Refunds: Please view our policy online at www.peopleandprocesses.com/cancellation-policy
