A strong competitive advantage relies on a few simple things - providing consumers with the products they want, when and how they want them, and at the price they are willing to pay. The challenge is enabling your organization to work effectively to create products that meet consumer demand and beat your competition to market.

Dassault Systèmes Industry Services works as your partner to enable extensive innovation capacity with the 3DEXPERIENCE® platform. We help to ensure that our technology is successfully implemented to fit your unique needs. Our services incorporate technology and industry best practices and methodologies that have been utilized in successful deployments across multiple business environments.

Consumers buy more than a company's product - they invest in the experience and value it brings to their lives. Dassault Systèmes Industry Services works to enhance and personalize your 3DEXPERIENCE solutions to unfold the freedom and power to connect with your customers to create, thrive, and change the world.
