

KSIR Low Floor

QUALITY, LUXURY, AND STYLE

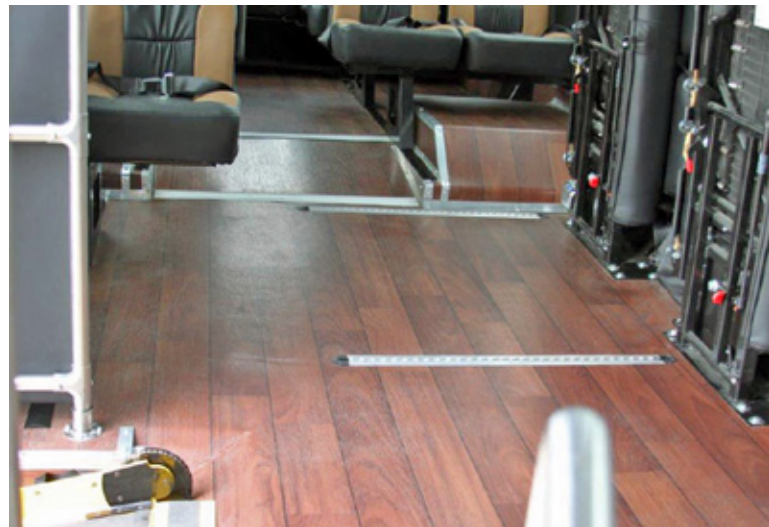

The active air suspension allows the driver to lower the bus 4" to make it easier for passengers to board and disembark. For additional safety, the "kneeling" feature and the Power Ramp can only operate when the bus is stopped, in park, and the emergency brake is set.

The Power Ramp allows passengers with wheelchairs, walkers, canes, or even a child stroller to easily board the bus. Without entry steps, the KSIR Low Floor ADA Bus eliminates the #1 cause of passenger injuries; tripping, slipping or falling on entry stairs.
