A stylized illustration on a dark blue background. At the top, a white hand reaches down from the top edge. Below it, a crowd of silhouetted people in business attire is walking. One person in the center has a glowing yellow head, and the hand is positioned directly above them. The text 'Enable your customers to protect their businesses with remote thermal monitoring and screening.' is overlaid in white.

Enable your customers to protect their businesses with remote thermal monitoring and screening.

Why Thermal Monitoring?

“The advantage of using telethermographic systems for initial temperature assessment for triage use is the potential use in high throughput areas (e.g., airports, businesses, warehouses, factories) and in settings where other temperature assessment products may be in short supply. The available scientific literature supports the use of telethermographic systems in the context of initial human temperature measurement during such a triage process.”

US Department of Health and Human Services, April 2020

Legal Disclaimer:

The statements made regarding this product have not been evaluated by the Food and Drug Administration nor has its efficacy been confirmed by FDA-approved research. This product is not intended to diagnose, treat, cure or prevent any disease, including COVID-19. All information presented here is not meant as a substitute for or alternative to information from healthcare practitioners. If the scan shows an elevated temperature reading, please use an FDA-approved thermometer to verify. If you are experiencing flu-like symptoms, please consult your healthcare provider.

Why Thermal Monitoring?

- Returning employees and visitors to buildings will require taking additional safeguards for health and safety
- Manual processes for temperature checks are not practical long term
- Thermal cameras have long been in use for security and are available and known technology

Use Case 1

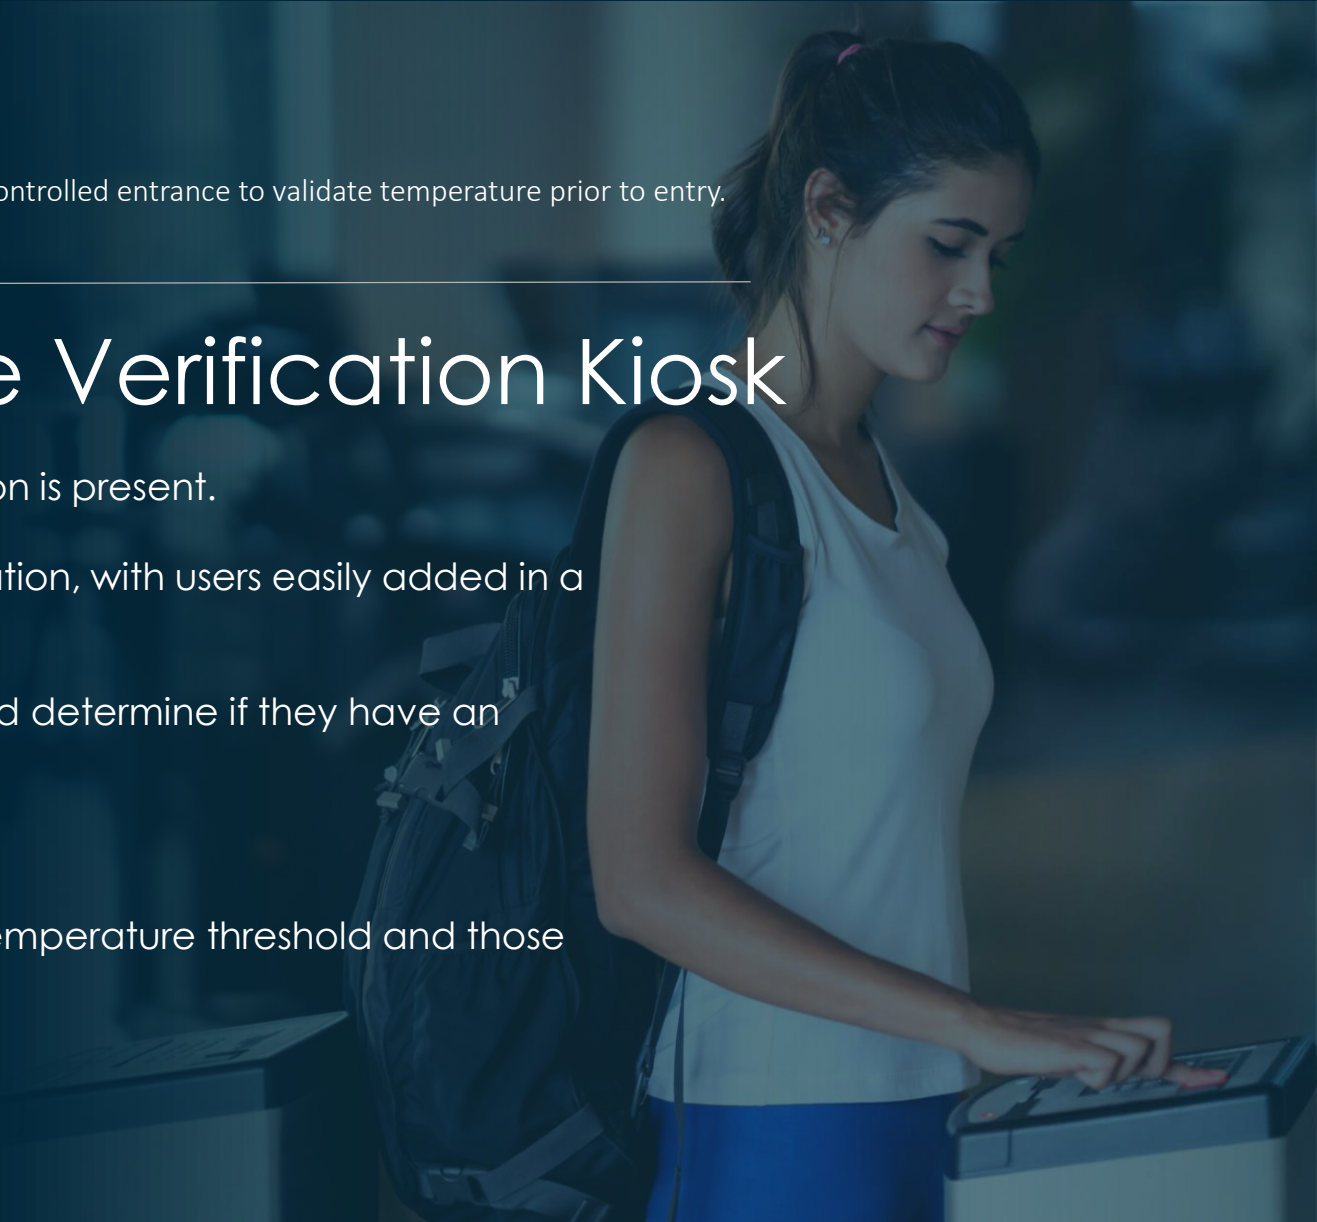

Controlled Entrances – Standalone Device
Small volume of entries

Requirement for an already human controlled entrance to validate temperature prior to entry.

HPI Meridian Temperature Verification Kiosk

Fastest to deploy where a guard or security desk/check station is present.

- The solution can also be programmed for facial identification, with users easily added in a few short clicks.
- Allows for fast way to evaluate employees upon entry and determine if they have an elevated temperature.
- Can validate face mask compliance.
- Alarms can be added to sound when those above the temperature threshold and those without access attempt to enter.

Summary of Offering

Overview

Features	HPI - Meridian
Customer Installable	Y
Integrates with access Control	Limited
Requires Active Person to Monitor	Y
Degree of Variance	.9° F

Pricing

Product	List Price (USD)	Warranty	Lead Time
Temperature Verification Kiosk D000B01 (HPI)	\$3,150.00	1 Year	4 Weeks

Pricing and Lead Times are Subject to Change
