

SolvTrue™

PW-4 Solvent Recycler

For Recycling Solvents used in Parts Washing,
Vapor Degreasing and Ultrasonic Parts Cleaning

Recycle and Reuse Industrial Solvents with 99% Recovery

Improve operational throughput and extend the life of your parts washing equipment by recycling and reusing clean solvent.

Features

Automation

- Can integrate with most parts, washers and degreasers
- Microprocessor controlled with easy-to-read LCD display
- Custom programming for unique solvent requirements

Safety

- Auto-shutoff sensors and pressure relief valves
- Waste transfer spill pumps reduce spill risk

Ergonomics

- Fast and easy removal of contaminants – liquids or solids
- All metal design with dual wall 304 stainless steel tanks

Performance

- Purity of solvents up to 99.5%
- Batch- and continuous-recycling models available
- Continuous solvent recycling

The SolvTrue PW-4 Solvent Recycler is a high-purity system for recycling solvents used in parts washing and cleaning including methylene chloride, trans-1, 2-dichloroethylene blends, trichloroethylene, Perchloroethylene, Vertrel™ series, Novec™ series, N-propyl bromide and more.

PW-4 Solvent Recycler

Technical Specifications

Capacity	15 gallon (57 liter)
	30 gallon (114 liter)
Dimensions	53" H x 48" W x 36" D (134 cm H x 122 cm W x 92 cm D)
Electrical Configurations	240 V/3PH/60Hz – Standard
	480V/3PH/60Hz – Optional
	220V/1PH/60Hz – Optional
Fill Device	Automatic fill pump
Cooling	Air cooled - Standard
	Water cooled – Optional
Chilling	Optional with water cooling
Waste Drain	Manual waste drain valve with actuator automatic pump
Solvent Recovery Type	Pass-thru recovery
Construction	Stainless steel
Recycler Height	15" legs - Standard
	30" legs – Optional
	40" legs – Optional

Cost-Saving Benefits and Advantages

Our industrial solvent recycling solutions are designed to help lower your plant's solvent spend, reduce solvent waste and disposal costs, adhere to relevant industry regulations, and maintain certifications while positively impacting the environment.

 Achieve sustainability

 Reduce hazardous waste

 Improve operational efficiency

 Save up to 90% annually on solvent purchase and disposal costs
