## Driving Business Online

A major theme in the leisure industry over the past few years has been to drive bookings and business online. After all, the benefits are clear; save money per transaction, decrease queues in centre, free up staff to deal with any issues that arise and increase utilisation across the board. Operators who take this step never look back- enjoying the rewards of decreased costs and increased customer engagement.

At Gladstone, we are proud to announce the launch of GladstonePay, a new online gateway designed to help you save money and make your customers' online journey smoother and slicker.

Tokenised payments e.g. encrypted stored credit cards, proven to increase spending and reduce basket abandonment

Adheres to the latest industry security standards with AVS, CVS and 3D Secure as well as, secure card processing which is PCI DSS Level 1 compliant

Simplified supply chain management by reducing the overhead of managing multiple contracts

Our innovative approach to billing means you buy a bundle for a full year of transactions; this means you can take into account variations in number of transactions i.e. you'll be making far more online sales in January than you will in December

Supported by Gladstone

## Challenge Us...

*to beat your current payment gateway price at your next contact renewal; we are confident we will be able to beat your current costs and delight your end users*
