RE: Joslyn Clark Fire Pump Controllers

Dear Valued Fire Pump Customer,

This letter is to formally inform you that, effective May 30th 2017, Specialty Product Technologies will no longer offer Joslyn Clark Fire Pump Controllers. The primary reason for our decision is driven by the latest NFPA 20 requirements (UL listing in accordance with UL218 Edition 3 and the harmonized versions of CSA and FM) that take effect in June 2017.

We recognize the impact that an obsolescence notification has on your operation. We will continue to honor our standard warranty terms and conditions. Fire Pump Controller after sales support, which includes replacement parts, technical support and repair services, will be handled by GDS Controls. More information about GDS Controls can be found on their website at <http://www.gdscontrolsinc.com/>.

Joslyn Clark will continue offering our standard Heaters, Relays, TM/HP Mod Kits, Push Buttons, Pilot Devices, and Contactors.

Please do not hesitate to contact our Customer Service team at customer.service@sptech.com or call 800.390.6405 with any questions.

Sincerely,

A handwritten signature in black ink, appearing to read 'Cathy Clausen', with a long horizontal flourish extending to the right.

Cathy Clausen
VP, Marketing
Specialty Product Technologies
