

# BIG SKY ASSOCIATES

## *Past Performance Summary*

Big Sky helps government executives slash risk, cost, time, and mistakes by applying data-driven products and services to core processes. Our customized approach aligns our team's efforts with your most important goals, providing you with optimized and streamlined programs that deliver results.

**U.S. Army** – Big Sky helped the Army's security and Insider Threat programs achieve across-the-board improvements in performance measurement and execution. Independent and inefficient initiatives were consolidated into a coherent strategic system framework.

Other results:

- Slashed cycle times for security clearances by 80%, saving \$200M in productivity and manpower
- Achieved \$450M in cost savings over five years
- Deployed a custom software budgeting tool for Army security to forecast resource requirements
- Advanced initiatives in new technology, personnel, continuous evaluation and HSPD-12.

*Our efforts were recognized with the Commander's Award for Public Service in 2010.*

**NASA** – The space agency knew it had to better manage its Space Technology programs and track agency-wide technology investments. Big Sky helped craft a clear strategy and operations plan for its most forward-leaning component, the Advanced Capability Demonstration Division.

**U.S. Air Force** – Under tight deadlines, Big Sky assisted the Air Force's new Insider Threat program in drafting a comprehensive implementation plan and deploying a new progress and performance tracker.

**Regional Bank** – The bank needed better information security measures and faced regulatory pressure. Big Sky conducted process analysis that improved identity information and automate processes.

**Private Equity Firm** - Big Sky built data-driven models to help the client gain insight into its security approval processes to optimize staffing and investigations. "Quick wins" saved an estimated \$500,000.

**Major Credit Union** - Information security could not keep pace with growth and remain compliant. We created an information security architecture strategic plan that conformed to security requirements and improved resource efficiency.

**Global Aerospace Firm** – The corporate R&D program was in flux due to investment priority changes and internal restructuring. A three-year plan was developed to define core processes and create a framework for new budgetary decisions.
