KeyWatcher streamlines University access control management

Serving your needs more quickly and efficiently

Kicking off the Year with Tradeshows

Monthly Newsletter January 2017 Edition

MORSE WATCHMANS
think inside the box.

Wake Forest Integrates Access Control with KeyWatcher Touch

Wake Forest University, one of the country's best-known liberal arts universities, located in Winston-Salem, NC, is migrating and upgrading approximately 25 KeyWatcher Illuminated systems to KeyWatcher Touch systems with Lenel access control integration.

Now Wake Forest's access control management department, who also has oversight of their key control system, can manage the provisioning and administration of every KeyWatcher in the system through Morse Watchmans' seamless integration with Lenel's OnGuard.

At present, there are approximately 30 KeyWatcher Touch systems in use at Wake Forest, with the Lenel access control in use across the entire campus.

The migration and upgrade began this past August and will continue over the course of the next several months.

Your orders now delivered even faster

Due to the rapidly growing demand for Morse Watchmans' KeyWatcher Touch and other flagship products, we are expanding our operations, production capabilities and shipping department to get you what you need more quickly than ever before. We are building a new facility, designed specifically for the purpose of storing and fulfilling larger orders with greater speed and efficiency. What does this mean for you? You will get your new KeyWatchers and other products even faster, helping you ensure the safety and security of your business. Please feel free to **contact us** if you have any questions or inquiries.

Kicking off the Year with Tradeshows

Even though the year has only just begun, Morse Watchmans is already on the road exhibiting at some of the top trade shows and exhibitions around the globe. This past weekend we were pleased to exhibit at Intersec at the Dubai International Convention and Exhibition Centre in Dubai, UAE from January 22–24 (Stand S2-E10).

Please check below for a list of upcoming tradeshows where we will exhibit – and stop by if you are attending! We'd love to see you and to update you about the software and hardware enhancements to KeyWatcher Touch, expanded integration capabilities, and more.

Mall Security Supported with Key Control Systems

Posted on January 12, 2017

Administering the safety aspects of a large retail environment requires an expanded knowledge of security practices in order to make good decisions regarding the protection of the facility and its employees and visitors. Cash, goods, business information/data, personal items and even identities are prime targets for theft in a retail environment and these vulnerabilities can be heightened due to lost or missing keys and other security irregularities. As a result, key control with automated tracking is high on the list as a state of the art security practice. **Continue reading**

Key Management Best Practices for Emergency Situations

Posted on December 20, 2016

Managing the consequences of a natural disaster or other emergencies is never easy, but it can be made more efficient with better preparation and follow up. Key and asset management systems are a valuable part of facility security, helping to protect staff, assets and areas and streamlining access for authorized users in both regular and emergency situations. When time is of the essence, these systems can also supply up-to-date and reliable information allowing personnel to react more quickly and proceed with established procedures regarding secure areas or valuable assets. **Continue reading**
