KeyWatcher is the modular, scalable, integrated key control and management solution designed for interoperability with access control systems. Access to the box and to individual keys is under your complete control. You decide who has permission to remove each key, and with KeyWatcher’s advanced communications capabilities, you always know who removed a key and when it was taken. Modular design means you can configure the exact components you need like card slots and lockers, with the ability to change modules where and when you need to. And KeyWatcher can grow as your needs grow.
the integrated access control solution

Smart Keys
- Track users and key movements via identification chip

KeyPro III Key Management Software
- Enhances programming and reporting
- Email Alerts help track Smart Keys

Illuminated Key Slots
- Makes retrieving and returning keys easier
