Solids-ejecting centrifuge
in clarifier execution

Centrifuge - Quick Delivery

Shipping Data

(Centrifuge with bowl AND motor)

Net weight, approx.	4740 lbs
Gross weight, approx.	5512 lbs
Volume, approx.	177 cf

Frame and cover, interior and exterior are restored to like-new condition. New seals, gaskets, and bearings are utilized along with other key components being fully refurbished. The bowl and frame are balanced as an integral unit.

This is a modern, large capacity centrifuge used for removing suspended solids from liquids.

Special design can
handle up to
10% solids

CHPX 517 SGV-34CGR
(Serial #4115561)

Available with new Control Suite(Control Panel and VFD), featuring Allen Bradley components.*

Preventative Maintenance Plan is also available to keep the separator running at peak efficiency and dependability.*

*Contact your Regional Sales Manager for additional information.

The complete unit is subjected to an extensive test-run check for smoothness of operation and proper function of all features.

Jacketed top part for cooling liquid not only keeps the temperature increase of the feed liquid at a minimum but also substantially lowers the noise level.

Technical Data

Capacity:	
Max. throughput	220 gpm(50 m ³ /h ¹)
Max. solids-handling	47 gal/h(1540 dm ³ /h ²)
Feed temperature range:	32 – 212 °F (0 - 100°C)
Motor:	50 HP
Noise level:	83 dB
