

Trustworthy Accountability Group

Industry-Leading Solutions for Agencies

Solving Billion Dollar Problems

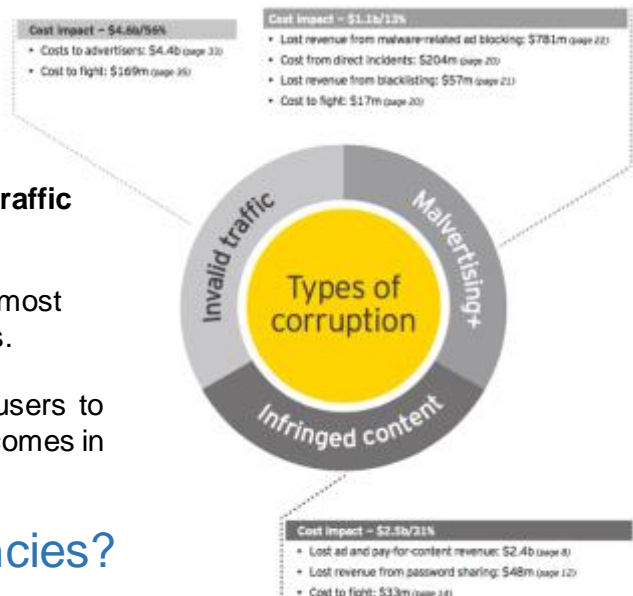

The Trustworthy Accountability Group (TAG) is a first-of-its-kind, cross-industry accountability program fighting criminal activity across the digital advertising supply chain. TAG works collaboratively with companies throughout the supply chain in four areas critical to the continued growth and development of the \$50 billion digital advertising industry:

- ✓ Eliminating Fraud
- ✓ Fighting Internet Piracy
- ✓ Combatting Malware
- ✓ Promoting Transparency

Digital advertisers lose billions each year to criminal activity in the areas where TAG focuses.

A recent study by the IAB and Ernst & Young (EY) estimated that **\$8.2 billion can be saved each year if the digital advertising industry works together** to eradicate corruption across the supply chain.

- At \$4.6 billion, costs associated with **fraudulent traffic** represent the largest portion of incurred costs.
- At \$2.4 billion, **infringed content** represents the most significant share of lost revenue opportunity costs.
- Combatting **malware**, which can expose web users to unknown or potentially dangerous third parties, comes in at \$1.1 billion.

What Can TAG Do for Digital Agencies?

Customer Protection

- The “Verified by TAG” Program ensures that criminals are not masquerading as your clients, and that they are only doing business with legitimate partners.
- TAG’s piracy, malware and fraud certifications enable you to provide “triple brand protection” for your clients, showing that you are serious about shielding their brands from association with malicious activity – and the criminals that benefit from it.

Smarter Ad Spend

- TAG helps you get the best value for your client’s ad spend – from avoiding fraud, to “buying smarter” on inventory, to identifying the best vendor solutions.

Thought Leadership

- TAG’s Working Groups and Leadership Council give your business the opportunity to network and learn from respected industry peers, provide strategic input concerning TAG’s development and priorities, garner positive press attention by serving as a TAG brand ambassador, and to show that you are committed to “doing the right thing” by building effective industry-wide solutions.

Customer Protection

It's Time to Get "Verified by TAG"

In order to solve the challenges of fraud, malware, piracy and transparency facing digital advertisers today, legitimate companies need a way to identify responsible, trusted players across the entire digital advertising ecosystem. The **"Verified by TAG" Program** provides exactly that. The cornerstone of TAG's anti-fraud efforts, the "Verified by TAG" Program makes it possible for companies to employ a "two-factor authentication" system for the digital ad supply chain: the TAG Registry and the Payment ID Protocol.

The TAG Registry is a Who's Who of trusted partners for any company involved in digital advertising, enabling companies to ensure that they are working with legitimate parties at every step of their digital ad campaigns. "TAG Registered" companies receive unique TAG-ID to identify their ad inventory to supply chain partners.

TAG's **Payment ID Protocol** enables companies to ensure that payments made in the digital ad ecosystem are going to legitimate companies. The Payment ID Protocol creates transparency by linking identifiers for the partners from whom a company buys ad inventory and those buying from that company to that inventory, effectively "following the money" across the entire digital advertising supply chain in order to prevent criminals from receiving ad spend.

Triple Brand Protection from Fraud, Piracy and Malware

The mission of the **"Certified Against Fraud" Program** is to combat fraudulent non-human traffic in the digital advertising supply chain. In order to guide companies in fighting fraud effectively, the TAG Anti-Fraud Working Group developed "Certified Against Fraud" Guidelines as well as a suite of tools to aid in compliance with those guidelines. Companies that are shown to abide by the "Certified Against Fraud" Guidelines receive the "Certified Against Fraud" Seal and can use the seal to publicly communicate their commitment to combatting fraudulent non-human traffic in the digital advertising supply chain.

The **"Certified Against Piracy" Program** was created to help advertisers and ad agencies avoid damage to their brands from ad placement on websites and other media properties that facilitate the distribution of pirated content and counterfeit products. Under the Program, TAG works with authorized independent third-party validators to certify advertising technology companies as Digital Advertising Assurance Providers (DAAPs) that provide other advertising companies with tools to limit their exposure to undesirable websites or other properties.

The **"Certified Against Malware" Program** provides companies with a roadmap by which to combatting malware effectively across the digital advertising supply chain. TAG's "Criteria for Effective Malware Prevention" provide a common set of principles and practices by which companies can effectively coordinate cross-industry information sharing. The program also provides a suite of tools to promote and support information sharing through a "hub model," and to partner with law enforcement in investigating and prosecuting criminal activity.

Smarter Ad Spend

The **Inventory Quality Guidelines (IQG) Program** reduces friction and fosters an environment of trust in the marketplace by providing clear, common language that describes characteristics of advertising inventory and transactions across the advertising value chain. IQG supports the information needs of advertising buyers by defining a common framework of disclosures that sellers can use across the industry. Buyers benefit from greater transparency, helping them know which sellers to trust and enabling them to buy advertising with confidence.

Thought Leadership

TAG provides a host of opportunities to network and learn from respected industry peers, provide strategic input concerning TAG's development and priorities, and garner positive press attention by serving as a TAG brand ambassador.

Leadership Council

The TAG Leadership Council is the operational decision-making body for the organization, as it determines and oversees development for products and initiatives that advance TAG's mission and fulfill the Board's direction.

Working Groups

The **Business Transparency Committee** builds trust, transparency and accountability throughout the digital supply chain by developing and promoting the adoption of standards, protocols and technologies that recognize trusted industry participants and help combat illegal activity.

The **Anti-Piracy Working Group** created and maintains the Certified Against Piracy to help advertisers and ad agencies avoid damage to their brands from ad placement on websites and other media properties that facilitate the distribution of pirated content and counterfeit products.

The **Anti-Fraud Working Group** works to combat the negative impact of fraudulent bot-generated, non-human. TAG develops and enhances anti-fraud standards, protocols and tools for all types of entities in the supply chain.

TAG's **Anti-Malware Working Group** coordinates industry-wide efforts to improve defense against malware to create a safer, more enjoyable experience for consumers and a more trustworthy system for advertisers.
