

A Steel
TANK
that matters
to our *life*

Basic Information

- Head Quartered in Nagoya – Aichi, Japan
- Indian Manufacturing Unit: Neemrana, Rajasthan
- Indian Marketing Office: Gurgaon, Haryana

Strength

- 15 Business Offices in Japan and 1 in India
- 6 Manufacturing Units in Japan and 1 in India

Vision

To be the World's Largest and most admired Stainless Steel Storage Tanks and Stainless Steel Panel Tank manufacturing company having expertise of more than 40 years.

Mission

To provide the best quality Stainless Steel Storage Tank and Stainless Steel Panel Tank in global markets using Stainless Steel 304/316 grades and to provide the purest and natural form of fluid stored.

Company Profile

BELTECNO INDIA PRIVATE LIMITED - (an ISO 9001:2008 certified manufacturing company), a Japanese Multinational Company, Established its manufacturing facilities in Neemrana - Alwar (Japanese Industrial Zone), Rajasthan in 2009. Beltechno launched its Stainless Steel tank business in Indian markets, thus adding 7th manufacturing unit in their portfolio for manufacturing quality products from Japan to India using SS 304 and SS 316 grade Stainless Steel materials.

BELTECNO CORPORATION started its journey in 1947 as Dyeing Machine manufacturer and had started manufacturing of Stainless Steel Storage Tanks in 1968. It has become the largest producer of Stainless Steel Tanks in Japan. Beltechno has been manufacturing a variety of tanks, especially water receiving and storage tanks by Hi-skilled welding technique since 1980 and supplying across the globe.

Our tanks has excellent corrosion and heat resistance capacities along with durability and economical modern design with easy maintenance facilities as Stainless Steel materials maintains a great hygienic environment. We commit supporting people in day-to-day life with clean water storage in our hygienic and high quality tanks. The tanks can be custom designed to meet the special requirements for our clients and fulfil social demands and our contribution towards environment with an assurance of fulfilling all your fluid storage needs.

We have been manufacturing a variety of tanks especially, water receiving and storage tanks made from SUS 304 and SUS 316 since 1980. These tanks can be used for storing various types of fluids like Solvents, Milk, Oil, Dilute Acids which are widely used in FMCG, Pharmaceuticals, Breweries, Distilleries, Dairies and Chemical units etc.

Beltecno Assurance

We assure to provide the best quality Stainless Steel Storage Tanks and Stainless Steel Panel Tank which can be used to store permissible fluids for domestic and Industrial usages. Your search for most durable, affordable, sturdy and alluring storage tanks, as Stainless Steel is evidently the best choice, can be fulfilled only here in Beltecno. Our products are made with highly corrosion resistant metal alloy, considered as environment friendly material and are 100% recyclable.

Our Products

1. Stainless Steel Storage Tanks

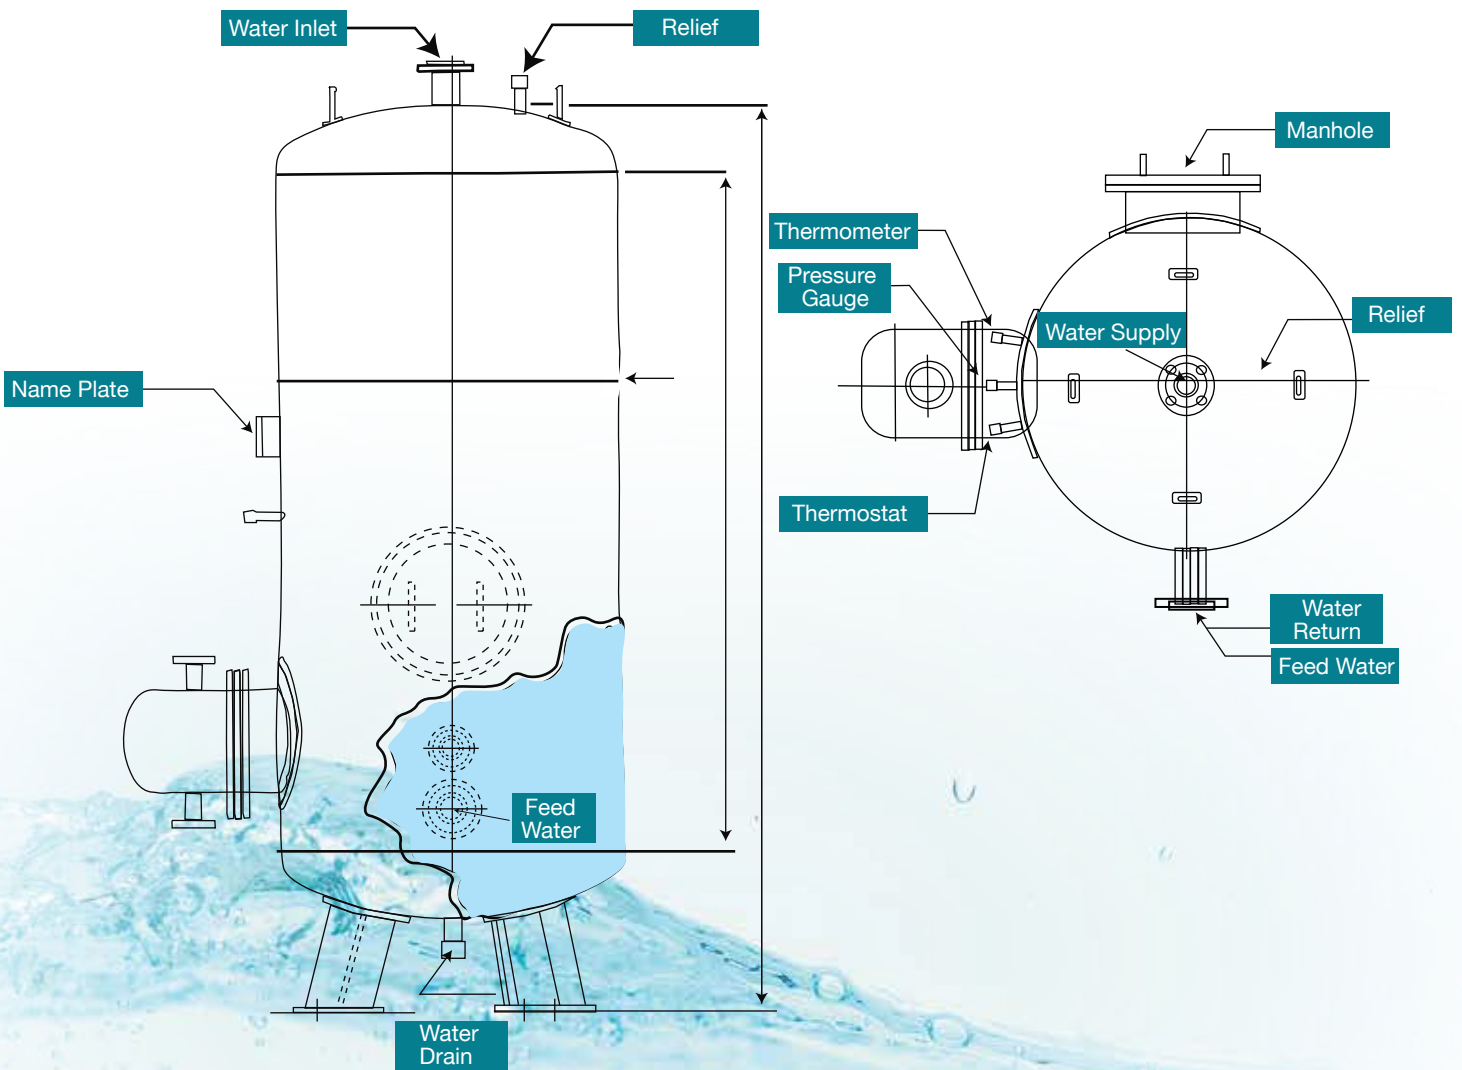

- Horizontal hot water storage Tanks
- Vertical hot water storage Tanks

2. Stainless Steel Panel Tanks

Storage Tank

Features of Stainless Steel Storage Tank

- Material of Construction SS 304/316 - Food grade for hygiene
- Capacity (L) - 500 Litres to 25000 Litres.
(can be customised according to customer requirement)
- Highly Durable and Weather resistant - No warping/wearing
- Unique dish-shaped bottom design gives highest delivery pressure at the outlet
- Ribbed design for improved strength, robustness and long life.

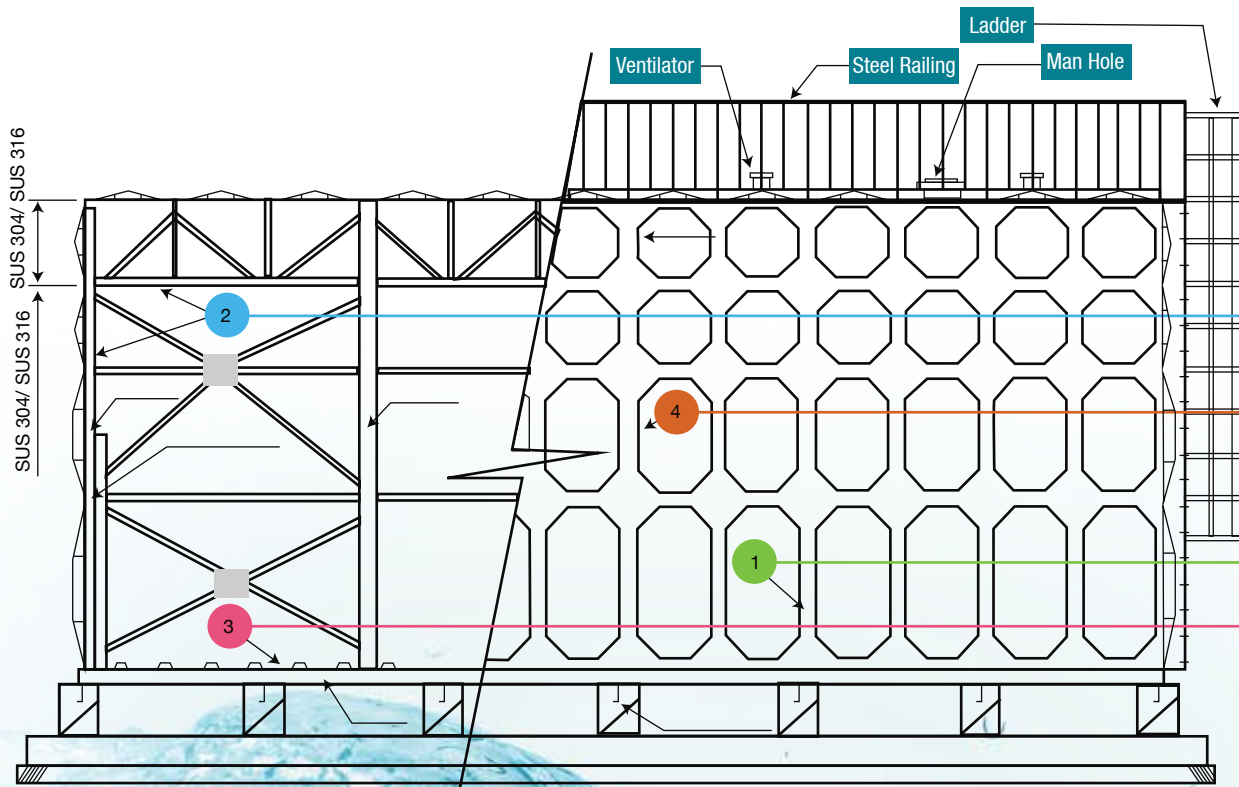

Advantages of Stainless Steel Storage Tanks

- Manufactured with advanced Seamless TIG Welding Technology thus ensuring corrosion free and leak proof welding. Ribbed for high strength and longevity - Lifetime performance.
- Get fluids in its natural form - Microbiologically 100 % Safe, Healthy and Hygienic through our tanks.
- Very mobile - easy to Install or Shifting anywhere and the storable fluid inside the Stainless Steel container is comparatively safer than stored in any other tanks due to non-porosity of Steel Surface.
- Environmental friendly, Light-weight, Maintenance and Leakage free.
- Cleaning is very easy due to the Unique Dish Shaped Design at the bottom of the tank.
- This minimizes the chances of Algae/Fungus formation, ensures no sedimentary Residue/Physical Impurities (which are common in Plastic/Concrete Tanks) thus preventing water borne diseases.
- The Operating Temperature of SS Storage tank ranges from 0°C to 90°C but can be customized according to the customer needs.

Panel Tank

- Corrosion Resistance: Durability, Heat resisting material and less prone to rusting.
- Aesthetic Design: Stainless Steel has Fine design & distinct beauty
- Recyclable: Environment Friendly & easy to recycle
- Light weight but having high strength and can be installed in any type of ground.

Features of Stainless Steel Panel Tanks

- **Simple and Durable:** Because All-Welded Construction, Assembled, Pressed, Diamond-Cut Panels by Well-Trained press operators and finally TIG welding is done to join all panels.
- High solid and stable design because well-calculated construction, Strong Frames with internal reinforcement by Columns, Beams and Pressed Materials.
- Easy maintenance and cleaning because of flat bottom designed construction
- Customized Design Ranges from 1,000 Litres to 10, 00,000 Litres and can be increased as per the user requirements.
- Stainless Steel Panel Tank is popular in Japan for storing huge amount Water, Solvents, Oil and Dairy Products etc. and can now is available for Indian users to meet their fluid storage requirements.

Advantages of Stainless Steel Panel Tanks

- Regardless of the introduction of other materials, Stainless Steel Storage Tanks remain the most excellent choice in terms of Compatibility, Durability and Rationally Priced.
- Stainless Steel Panel Tanks are made up of SS 304 and SS 316 for high Capacity Water/Fluid reservoirs is far more remarkable and outstanding performance with rational price structure.
- Stainless Steel Panel tanks are in the best hygiene, as it can be easily cleaned due to flat bottom structure and helpful for frequent inspections and drain works. This minimizes the chances of Algae/Fungus formation, ensures no sedimentary Residue/Physical impurities (which are common in Plastic/Concrete/FRP Tanks) thus preventing water borne diseases.
- The Panel Tank is suitable for the Business Complexes, Public Facilities, Office Buildings, Schools, Hospitals and Factories and, also for Private Businesses to suit any facilities and equipment's.
- The biggest advantage of these Panel Tanks is their extreme durability, which is highly greater than other types of tanks available in indian market

Comparative Details

Fibreglass Tanks	Stainless Steel Tank	Concrete Tank
Need a food-grade coating to be standards for storing water.	SS tank protects from corrosion, hygienic storage conditions for food grade fluids as per standards.	Quite strong and long lasting but introducing of reinforcing steel into concrete has created in durability problem.
Allow light entry and are often dark coloured to reduce algae growth	Tanks can be customized from 1000L to millions of litres of water as per the requirements.	When embedded reinforcing steel corrodes which causes concrete to crack and break.
Stiff and rigid, but relatively thin, light making them quite brittle and prone to cracking	Suitable for extremely large storage requirements. Thin but has high strength along with durability.	Lime, which is found in concrete, can also leak into the water resulting contamination of water.
Tanks quality depends on its maker, so thoroughly quality check should be done.	Quite expensive to fabricate but cheaper on longer run usage. Can be installed anywhere as per requirement.	Generally installed in underground for commercial purposes, but can also be used for residential purpose too.
Has heat absorbing properties	Has less heat absorbing properties	No Heat Absorption
Cannot be recycled – Not Eco-Friendly	Can be recycled – Eco-Friendly	Cannot be recycled – Not Eco-Friendly
No Scrap Value	After 40 years, value of the tank remains same as value of scrap.	No Scrap Value
Huge maintenance required on regular intervals. Hectic cleaning & frequency is more.	Less maintenance as no serviceable parts are there, easy & very less frequency of cleaning required	No provision of cleaning and very difficult to clean.
Has height constraints.	No Height Constraints.	Has Height Constraints.

Benefits of Stainless Steel Tanks

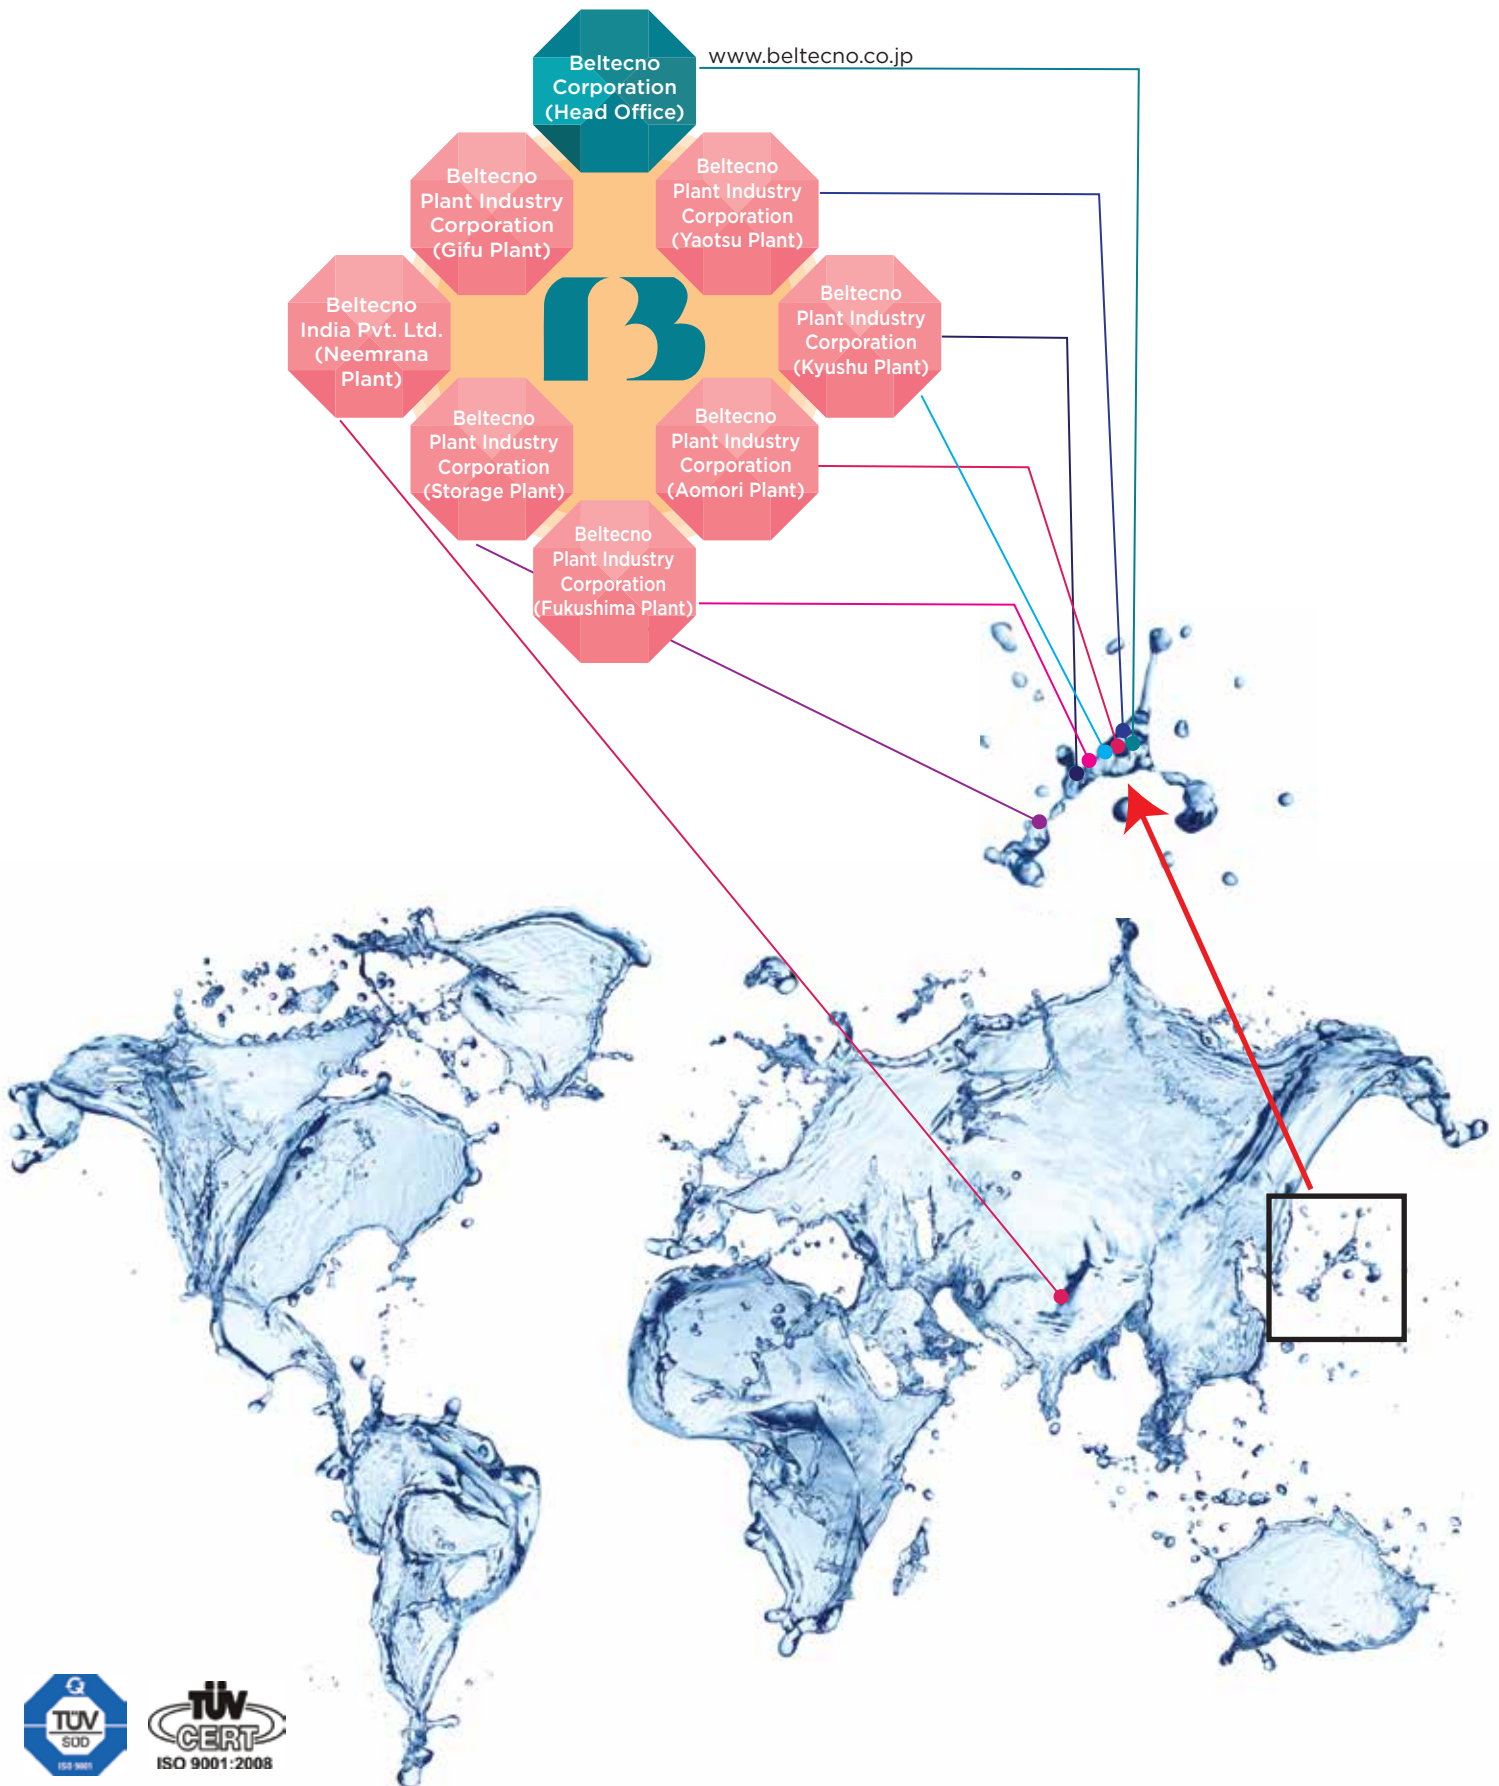

- SS tanks provide a strong scratch resistant surface.
- SS tanks could be cleaned easily using regular detergents, high pressures washers, or even by using steam.
- SS tank are lighter in weight that it becomes easy to install.
- Maximum sanitation protection.
- High impact resistance from shattering and scratches

Application Industries/Potential Users for Our Products

- Food and Beverage
- Brewery and Distillery Units
- Pharma/Fertiliser Industries
- Water Treatment Plants
- Hospitals
- Schools
- Hotels
- Apartments/Business Complexes
- Hydro Projects/Power Plants
- Process Industries/Cement Plants
- All Industries requiring Huge Storage of Water
