

## THE CUSTOMER

Maverick Oilfield Services Ltd. Is a leading provider of oil and gas construction and transportation services. They deliver safe, efficient, innovative and quality solutions with their highly skilled team.

Whether it is a single well battery or a new ground-up, multi-module facility or pipeline, Mavericks' crews of experienced supervisors, pipefitters, welders, and operators offer a construction solution that meets or exceeds industry and customer standards.

The transportation division is a growing segment of Maverick's service offering, providing customers the competent and qualified personnel necessary to get their loads safely and efficiently from the vendor to the jobsite.

Systems Profile:  
Sage 300  
Technisoft Service Manager

Here at ASYMA, we are in it for the long term and will be there whenever our customers need us.

## CHALLENGE

Maverick needed a system that would eliminate double entry, reduce errors, and provide timely project costing information to hold the project managers accountable. The system needed to effectively handle both construction and transportation processing requirements.

### FOCUS ON DELIVERING ON TIME AND ON BUDGET

Maverick Oilfield Services Ltd has developed a company based on the values of integrity and quality. They knew that to do the job right – on time and on budget – with the quality that customers demand, they had to automate their service and transportation processes.

Maverick also had to reduce wasted hours, eliminate duplication, reduce human error, and hold project managers accountable. After a failed attempt with another software solution, they chose Sage 300 with Technisoft Service management for its ease-of-use, strong integration, and flexible reporting. With Asyma Solutions Ltd and their matching focus of delivering on time, on budget, and guaranteed results, Maverick felt they had found the right match of software and consultant.

## SOLUTION

Asyma Solutions configured a custom combination of the flexible Sage 300 and Technisoft Service Manager that met the processing requirements.

## RESULT

The ability to grow, reduced administration issues, and accurate project costing. The new system allows for the streamlined entry of all information into an integrated service management system. Maverick is able to provide project managers and customers with information on a timelier basis. The enhanced processes have improved accuracy and eliminated hours of wasted time in the re-entry of data.

## ABOUT ASYMA

### GUIDING GREAT BUSINESSES

Asyma Solutions LTD believes customers deserve systems that work.

We believe in using technology and management best practices as effectively as possible to help your organization succeed.

This is done by providing innovative and sound proactive professional advice, products and services to enhance the financial well-being of your organization.

**Here at ASYMA, we are in it for the long term and will be there whenever our customers need us.**

## RESULT (CONT.)

### INNOVATIVE QUALITY SOLUTIONS: MAVERICK

Maverick decided to keep their existing Sage 300 accounting system and add on a fully integrated Technisoft Service Management solution. With the partnership of Asyma and Maverick's team of highly skilled and committed employees, Maverick could move forward knowing that the chosen solution included the functions that provided them the most benefits and savings. Maverick Oilfield Services Ltd was able to use the flexibility of the Technisoft system to handle the complex issues of construction and transportation in the oilfield industry.

Erkin Atakhanov, Maverick's VP of Finance said, "Asyma received the highest score comparing other potential consultants." As with any company, the changes and challenges continue with acquisitions and new services, and it requires a constant review of potential improvements in technology and management processes to help Maverick change and adapt.

### INNOVATIVE QUALITY SOLUTIONS: ASYMA

With innovation, quality solutions, and their skill in system and procedures design, Asyma enabled Maverick to streamline their processes. Software is only 50% of the solution – the remaining 50% is designing processes in conjunction with Maverick to promote accountability, eliminate wasted resources, and save time. The result has been improved profitability and better customer service.

Long-term support is critical to the success of any software implementation. Asyma is in business for the long haul and we base our business on building long-term relationships with our clients. Our support contract options provide Maverick with easy access to our team of highly skilled consultants, removing the risk of having a solution fail. Continued process reviews, support, and training are the best ways for Maverick to continue to grow and use the systems effectively.
