SENIOR CARE

RESET RESTART REOPEN

General Recommended Guidelines

- All caregivers should be required to wear PPE (Personal Protective Equipment).
- Provide virtual or telehealth where possible.
- Provide COVID-19 care training and increased education to caregivers as it becomes available from the CDC.
- At employer's discretion, employee temperatures and verbal health screenings can be implemented prior to work. Minimum temperature indicating possible fever per CDC guidelines is 100.4°F; however, for caregivers working with seniors, a lower number (100°F) should be considered.
- Ask clients to wear PPE if possible.
- Clients should be asked to let providers know prior to scheduled visit if they are sick or exhibiting signs of illness.
- Prior to entering a home, verbal health screenings and temperature check should be conducted.
- Caregivers and clients should be encouraged to wash hands pre and post treatment.
- Payments should be processed via touchless systems in so far as possible.
