Spend less time on paperwork so you can **spend more time on things that really matter to you**, and make better farm management decisions by seeing the information that matters, when it matters. Keep your farm records safe, forever.

Getting your animals into Herdwatch

In order to download your animals into Herdwatch, you have to log-on to your **www.agfood.ie** account and link it with Herdwatch. This is an easy one-off process that simply gives Herdwatch permission to access your herd details.

- Go to **www.agfood.ie** and log in using your username, PAC number & password.
- Select **Animal Identification and Movements**.
- Click on **Interact with AIM using Farm Software Provider**.
- Tick the box to the left of Herdwatch and select **Continue**.
- Tick the box agreeing to T&C's and enter your email in the two email boxes.
- Click **Submit**.

To eliminate the Blue Book, you MUST also set Agfood as your **Bovine Electronic Herd Register**.

For more information on breeding, movements, crop

🏷️ Register a calf

- Tap the ➕ button.
- Tap **Calf**.
- Select the **Gender**.
- Scan the barcode on the calf tag (this will open your phone camera) or enter the digits.
- Select the cow that has calved (if you have breeding records in Herdwatch then you will be shown a list of cows due).
- Fill in the **Date of Birth**, **Calving Difficulty**, **Sire** and **BDGP** information if necessary.
- Any fields in **ORANGE** are mandatory and must be filled in.
- Once ready, tap **Save** at the bottom.
- Tap **Register Calf Now**, enter your PIN and we will send the details to the Dept immediately. You will receive a message to confirm if the registration was successful.

PRO TIP
You can register calves even quicker if you enter your serves into Herdwatch. When on a serve for a cow, click on the ➕ button and tap on **Add Calf**, the **Dam** and **Sire** information will automatically go across into the calf registration form for you.

🐄 Create animal groups

- Tap the ➕ button.
- Tap **Create Group**.
- Type in a name for your group under **Title** (i.e. 2020 bull calves) and tap **Next**.
- Search for the animals you want using the search icon 🔍 or use the **Filter** button to select **Gender**, **Breed**, **Age** and other filters.
- Select **Animals** and tap **Save**.

PRO TIP
When selecting animals to create a group or new record, the new **Smartlists** feature in the NextGen app will allow you to find the animals you want faster.

Remedy purchase

- Tap the **+** button.
- Tap **Remedy Purchase**.
- Simply scan the QR/barcode of the remedy, or select it from the list.
- Fill out the relevant information in **ORANGE** about the remedy.
- Click **Save**.

Remedies Cabinet

When a remedy purchase is recorded, it is added to your virtual remedy cabinet. This tracks quantities purchased and use allowing complete visibility over your remedy stocks.

PRO TIP
You can make selecting animals for batch dosing simple by creating an **Animal Group** and then record a single treatment for all animals in that group.

Record a treatment

- Tap the **+** button.
- Tap **Cattle Treatment** or **Sheep Treatment**.
- Pick the Remedy from your remedy cabinet – If it's not there, follow the guide above.
- Select the date the treatment was given.
- Fill out the relevant information in **ORANGE** about the remedy such as quantity.
- Tap **Next**.
- Select **Animals** or **Group** you treated.
- Tap **Save**.

Features

Your Herd in Your Hand
Sync seamlessly with your Agfood online herd register and with ICBF for serves and animal history – no manual entry.

Paperless Remedies & Movements Compliance
Simply scan remedy purchases and record animal treatments in seconds for Bord Bia and Cross-Compliance.

Calf Registration On The Spot
Simply scan the tag using your phone camera – supports pedigree and BDGP requirements.

Full Breeding Cycle Management
Reduce your calving interval with records and notifications on heats, serves and scans.

Order Replacement Tags in One Click
Record your missing tags in app and order your replacement tags directly from the app when you need them.

Weight Recording & Tracking
Record weights fast, and see Average Daily Gain immediately on your screen.

Sprays & Pesticides Compliance
Manage purchases and application compliance for the Sustainable Use Directive (SUD).

The Watchboard™
Your farm's virtual noticeboard – actions and reminders in the palm of your hand.

Easy To Manage Reporting
All management and compliance reporting in one place.

No Connection? No Problem
The app works even without an internet connection, information will automatically back up to the cloud when possible.

Easy to get started...

1 Download the app

2 Enter your herd number

3 Sync your herd

Do you need **help?**
