

EMPACT® Cloud

HTX
LABS

Train Anytime, Anywhere, with Anyone, on Any Device

EMPACT Cloud delivers a secure, cloud-based infrastructure and analytics engine to host, distribute, integrate, and measure immersive training. Cloud centralizes learning to support a closed feedback loop, learn-by-doing approach, and reporting to prove training effectiveness.

Key Features & Benefits

Secure Content and Device Management

Host, distribute, and manage training with CAC/SOS, deployed on Microsoft's Azure for Government Cloud (IL5).

Seamless Integration

Integration-focused architecture ensures compatibility with various software ecosystems including learning management systems (LMS), data analytics engines, and cognitive engines, via xAPI.

Rich Analytics Capture

Robust data and analytics capture to visualize progress, monitor completion, analyze training effectiveness, and assess competency.

Hardware Agnostic Deployment & Delivery

Training distributed and consumed across a range of XR and non-XR devices, headsets, and hardware.

Multi-Modal Learning Framework

Various learning modes, Explore, Watch, Guide, and Assess support an adaptive, scaffolded, learn-by-doing approach to self-paced learning.
