

SIMPLICITY, SAFETY & SOCIAL DISTANCING HAS A WHOLE NEW MEANING FOR ALL OF US . . .

FEEDBACK FROM THE FIELD

Lisa M., COTA/L, ATP/SMS, CRTS
 "Despite all that's going on right now with COVID-19, I'm thankful for Motion Concepts. Motion sets my chairs up based on my measurements so we have been able to deliver chairs to our clients without having to make any major adjustments. This helps keep our physical contact with the user minimal. Also, because of LiNX Electronics we are able to program the chairs, not only for our deliveries, but for new K0861 evals while staying more than 6' away from the person, thanks to live, wireless programming!"

**MOTION CONCEPTS,
COMMITTED TO HELPING YOU
NOW AND ALWAYS!**

Every **Motion Concepts** system is thoughtfully crafted to offer **maxx**imum function, durability and ease of operation. We always sweat the small stuff because it's the little things that make a big difference!

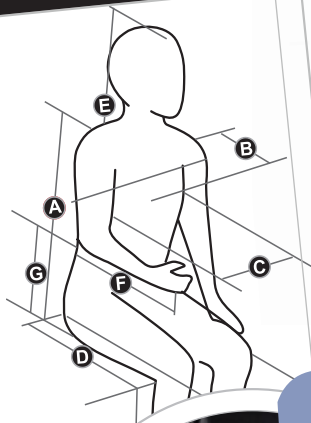

We set up all of our chairs based on the measurements provided to us at time of quote. This helps make sure there is less work for the ATP, Clinician or Technician to do when the chair is received. All of the settings have been made - from leg length, back height and even armrest height, to name a few. This helps you be efficient as well as keeping within the social distancing guidelines. This is just our way of helping. . . . even in a small way.

REQUIRED MEASUREMENTS

To ensure system is accurately configured please fill in all required

Client Height:	
Client Weight (lbs):	
A. Seat to Shoulder:	
B. Trunk Depth:

D. Knee to Back:	
E. Seat to Top of Head:	
F. Elbow to Hand:	
G. Seat to Elbow:	
H. Hip Width:	
I. Knee to Heel:	
Cushion Thickness:	

Programming for the best outcomes for your clients, whether it is for delivery or evaluation, has always been your top priority whether you are a clinician or an ATP. With these challenging times, our ability to still give your customer the best driving experience hasn't changed. **LiNX**® Technology on the TDX SP2 Power Wheelchair helps you follow the CDC guidelines by wirelessly programming your clients chair live while still staying 6 feet away or more.
