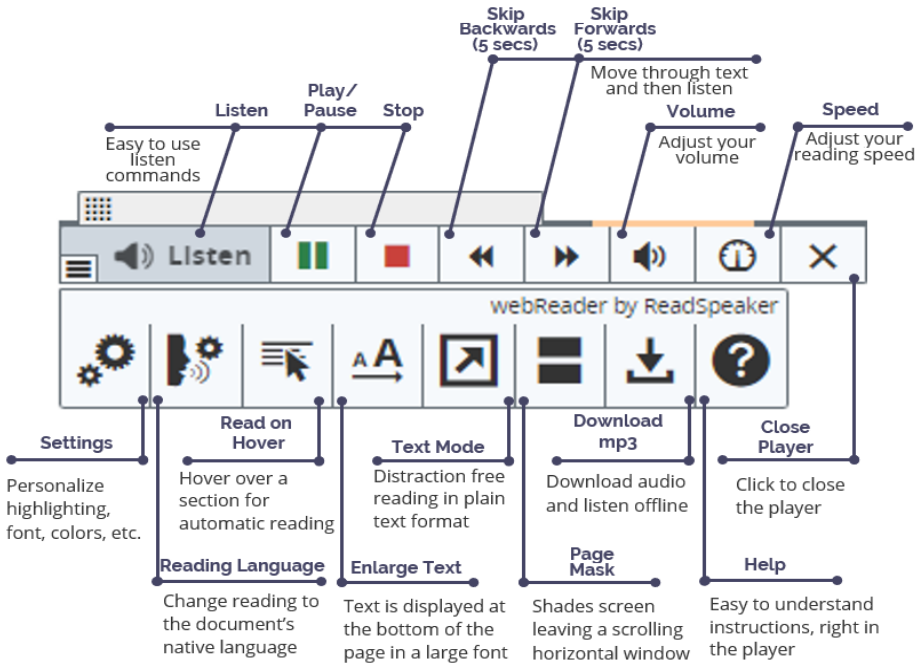
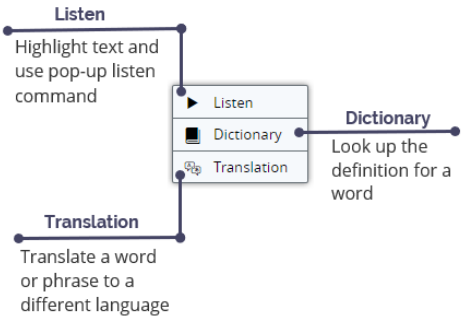
ReadSpeaker webReader





Highlights of ReadSpeaker webReader

- Easy to use listen commands make bimodal learning a great option.
- Move through your text at 5-second increments (forwards or backwards.)
- Adjust the volume, reading speed, and the settings to your preferences. This will need to be done on each device.
- Read on Hover allows you to move your cursor down the page, highlighting paragraphs to be read aloud.
- The Enlarge Text tool shows the magnified text at the bottom of the page for those with lower vision or who are distracted readers.
- For the distracted reader, Text Mode, which is plain text, or the Page Mask will be good options.
- Don't know a word? Translate it to a different language with the Translation tool or look it up in the Dictionary. Remember to drop suffixes if the word cannot be found in the dictionary.
- Download the audio for offline listening.

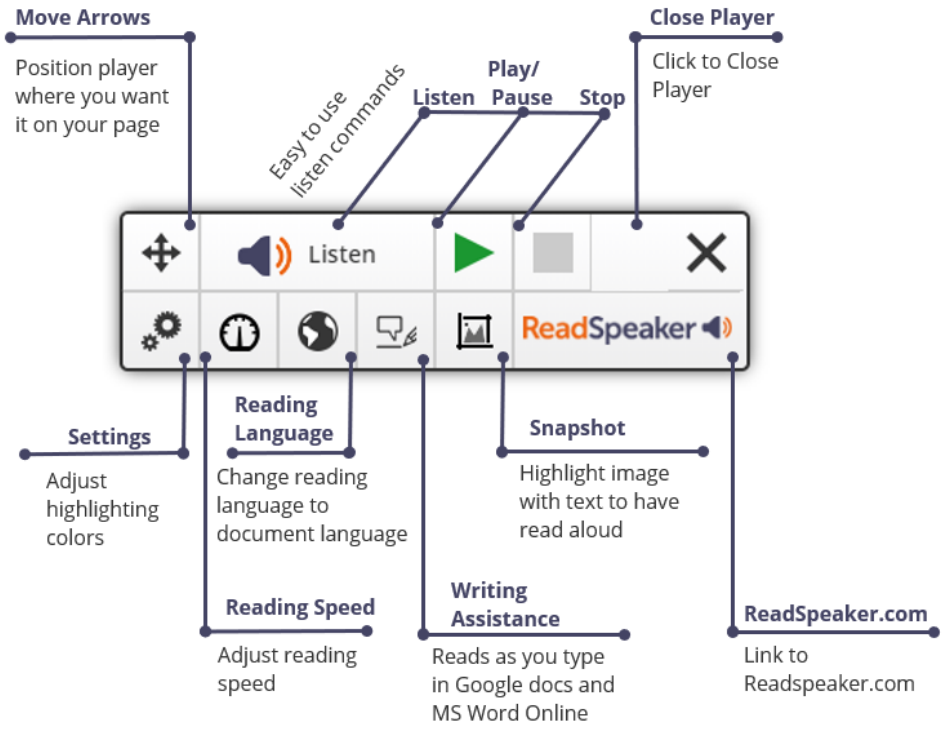
- Can't type? Use the dictation tool to get your words on paper.

Player/Tool Highlights

ReadSpeaker TextAid Extension



Highlights of the ReadSpeaker TextAid Extension

- Read files in Canvas.
- Read any webpage using the extension.
- Adjust the word and sentence color highlighting to your preferences.
- Adjust the reading speed – Going into an occupation where information comes at you fast? Max out the reading speed to learn how to listen at the faster pace.
- Change the language to the language of your document. (Available if you have purchased additional languages.)
- Hear your words and sentences read to you while typing in Google docs and MS Word online. This helps you to catch typos, left out words, clumsy sentences, etc.
- Highlight an image that has verbiage on it and hear the verbiage read aloud using the Snapshot tool.
- Available for Chrome, Firefox, Edge and Opera.
