# Make 2019 count

Over the last four years we've collaborated with some of the most respected brands and experts in the fashion industry to accelerate the careers of more than 4,000 emerging creatives and brands from over 95 countries around the globe.

Over that time, the Mastered experience has evolved to become a much more personal one. One where every professional receives expert guidance in three ways - through mentoring, performance coaching, and from our own in-house support team.

Our alumni are people who knew they were meant to succeed, and felt driven to prove it. They know the many hard miles spent getting there, the punishing schedules, the knowledge only gained through experience, and the relationships you must build along the way. In the end, we do it because we love it.

You chose a challenging path, don't make it one you're walking alone. To help you get there, get actionable advice, a global network of potential collaborators, and industry opportunities that are exclusive to this community.

Take this chance to put all your hard work into practice. To make your potential count.

We've developed this 10-month accelerator to help emerging talent who are ready to commit to claiming their place in the industry of the future.

Take a look at what this year could hold for you.

# Join a network of opportunity

No one succeeds alone. Which is why you will join a global network of 4,000 professionals to network and collaborate with. Creative briefs set by industry legends will give you the stimulus to discover and work with peers.

- Profiles of the entire network live on the Directory. You can search by discipline, by location, or by name
- Find collaborators by looking at their work, their client list, their biography, their social profiles and their contact details
- You'll be set three collaborative briefs over the course of the year. In 2017 these briefs were set by the creative director **Fabien Baron**, the photography duo **Inez and Vinoodh**, stylist **Patti Wilson** and The Impression founder and editor-in-chief **Kenneth Richard**
- Local meetups take place all over the world, organised by your peers, to help you meet each other in person and build your relationships

**Vogue Italia's** senior photo editor, Alessia Glaviano, published the work of six Mastered teams on PhotoVogue – Vogue Italia's digital platform. This highlighted stories from a Mastered collaboration brief entitled "Say Something" set by stylist, and Vogue Italia's fashion editor-at-large, Patti Wilson. In her Mastered brief she challenged professionals to create a story that made a statement about the world around them

**i-D**, the iconic British youth magazine beloved by industry insiders and consumers alike, has provided an impressive platform for Mastered’s professionals. More than 120 of our creatives have been featured in articles that range from highlighting what inspires our makeup artists to spotlighting follow-worthy Instagram accounts, as well as showcasing dozens of incredible images produced in response to Mastered’s collaboration briefs.

International, independent fashion magazine, **HUNGER** (owned by legendary photographer Rankin), published images by six Mastered teams on their digital platform. Mastered teams reimagined iconic scenes, from *The Birds* to *American Psycho*, with over 80 professionals seeing their work not only in the print edition but across The Impression's website and social channels.

# Accelerator overview

Your Mastered learning journey has been designed by our in-house producers, in collaboration with the some of the world's top fashion names. We guide you through compelling video and written guides while you are mentored by the industry's most successful experts, as well as Mastered's coaches and a support crew dedicated to you.

# Your aesthetic and public profile

To succeed as a fashion stylist, you need a defined aesthetic. The fashion industry needs to notice you and understand what kind of artist you are - and then book you. You need to know where - and what - you want your work to be so that you can take the right steps to get there.

The starting modules of the accelerator are all about goals and your aesthetic. You'll be working out who you are as a creative and defining the fashion magazines and brand clients who are right for you and what you want to achieve – both on the accelerator, and in your career.

## **In this module, you will:**

- Explore what makes you unique and start to define what makes you stand out to others
- Gain a deeper understanding of what success looks like for you personally as you find your place as a creative in the fashion industry
- Begin the process of identifying the fashion clients who are right for your style
- Set goals that will help you achieve what you want from your career, while remaining true to your own personal brand, values and ideas of success

# Creative process and trends

Once you've defined your voice and unique signature as an artist, it's time to develop the tools of your craft and refine your process so that you can deliver consistently, while putting your own stamp on any project.

The second module of the program is about applying your voice creatively to those projects and delivering your ideas in innovative and relevant ways.

## **In this module, you will:**

- Learn how to identify and use trends, as well as how to launch your own. You'll also discover how brands use trends to influence, innovate and sell
- Understand how to turn concepts and ideas into a finished product that fits the needs of the fashion industry, creating a demand for your work

# Fashion fundamentals

Today there are more magazines, brands, designers and celebrities than ever, all keen to work with talented stylists. Each will have their own type of brief and require a different approach from you every time.

Here you'll learn the fundamental skills needed to adapt your craft across the industry, and discover how to work with the titles and brands that align with your goals.

## **In this module, you will:**

- Learn how to get editorial and commercial clients, plus explore how to land lucrative jobs, such as TV, private clients and celebrities
- Gain insight into working with diverse collaborators within creative teams, and the varied roles you'll need to take on to work successfully in this area

# Future fashion

There are more opportunities than ever to showcase your skills as a stylist and pitch yourself as an original, adaptable creative. It's about making the most of the increasing opportunities available in the changing fashion industry, and creating ideas that match the demands of magazines and clients who want to stand out from the crowd.

Here you'll learn the next steps of bringing your styling to new, diverse audiences and gaining a reputation as a desirable, forward-thinking stylist.

## **In this module, you will:**

- Discover wider job opportunities available to you in fashion, and how to apply and adapt your styling skills to get work with a range of clients
- Learn how the fashion industry is changing, and how you can take advantage of this to solve problems for magazines and brands who want to develop in the digital world
- Understand more about the 'next steps' roles available to you as a stylist, from fashion directing at a magazine to creative direction for a brand, and lucrative consultancy work

# Your brand and career ahead

To succeed in the fashion industry, you need more than just creative skills; after all, you're not just an artist, you're a brand.

In this important final module, you'll learn how to promote yourself, how to present your work and how to thrive in the industry and achieve your goals. You'll understand how to plan your career, so you can continue to create and achieve your goals while remaining motivated, inspired and excited about your future.
