**Estero, FL July 10, 2017** -- Enabling Technologies Corp. today announced it has won the 2018 Microsoft US Modern Workplace - Intelligent Communications Partner of the Year Award. The company was honored among a US field of top Microsoft partners for demonstrating excellence in innovation and implementation of customer solutions based on Microsoft technology.

“We are honored to be a Microsoft Modern Workplace - Intelligent Communications WINNER in 2018! This is Enabling's 4th time in the winner's circle and our team of engineers and project managers consistently develop new and innovative ways to integrate Intelligent Communications and Collaboration for enabling the digital workplace with Office 365” said Bill Vollerthum, President Enabling Technologies Corp.

Awards were presented in several categories, with winners chosen from a set of more than 2,300 entrants from across the United States. Enabling was recognized for providing outstanding solutions and services in Intelligent Communications and Collaboration. For the award, Enabling was able to demonstrate expertise in the Communications Evolution over the past year, assisting client all along the adoption continuum from Skype for Business and Security within Office 365 to Microsoft Teams. Enabling has also provided Change Management to various clients to assist in getting enthusiastic adoption of Microsoft Teams. To make the jump to Intelligent Communications, Enabling Technologies regularly pilots new integrations such as our Marketing Teams to Planner workflow which automatically populates Planner with routine marketing tasks by just clicking a tab in Teams and creating a name of the event. With a little imagination many boring tasks can be automated through Intelligent Communications in Teams.

**About Enabling Technologies:** Enabling Technologies is the leading Systems integrator of Microsoft Office 365 solutions. Enabling has 26 years of messaging and real-time communications experience and over 1600 deployments of Microsoft Skype for Business/Lync, Microsoft Security, Azure and Office 365. Enabling's tried-and-true processes have helped customers minimize risk, maximize existing investments, and optimize the end-user Intelligent Communications experience. Enabling takes an all-inclusive approach to projects, mastering the technical components while also optimizing the people and process side to technology rollouts. We specialize in secure Cloud solutions including Office 365 and Azure AD, Multifactor Authentication, Intune, Azure Information Protection, Cloud App Security, and Azure Security Center. Having Enabling design, implement, and proactively monitor your Office 365 and Skype for Business systems is the first step to changing the way your workforce thinks about communications, for the better. Enabling

Technologies' staff is comprised of seasoned, certified IT professionals who work with a range of next-generation technologies and can recommend and implement the "right solution" for our customers. As validation, Enabling Technologies, a four-time Winner of the Microsoft Partner of the Year award, has provided professional services and solutions to organizations of various sizes from such diverse industries as government, legal, financial, pharmaceutical, manufacturing and medical.
